

**BEFORE THE
GEORGIA PUBLIC SERVICE COMMISSION**

**IN THE MATTER OF: GEORGIA POWER
COMPANY'S TWENTY-FIFTH SEMI-
ANNUAL VOGTLE CONSTRUCTION
MONITORING ("VCM") REPORT**

DOCKET NO. 29849

DIRECT TESTIMONY

AND EXHIBITS

OF

TOM NEWSOME, PE, CFA

PHILIP HAYET

LANE KOLLEN, CPA, CMA, CGMA

**ON BEHALF OF THE
GEORGIA PUBLIC SERVICE COMMISSION
PUBLIC INTEREST ADVOCACY STAFF**

December 1, 2021

TABLE OF CONTENTS

I. INTRODUCTION	1
II. REVIEW OF GEORGIA POWER COMPANY’S VCM 25 REPORT	2
III. STAFF ECONOMIC ANALYSES	5
IV. RATEMAKING ISSUES	16

I. INTRODUCTION

Q. PLEASE STATE YOUR NAMES, TITLES, AND BUSINESS ADDRESSES.

A. My name is Tom J. Newsome. I am the Director of Utility Finance with the Georgia Public Service Commission ("Commission"). My business address is 244 Washington St., Atlanta, Georgia, 30334.

My name is Philip Hayet. I am a Vice President and Principal of J. Kennedy and Associates, Inc. ("Kennedy and Associates"). My business address is 570 Colonial Park Drive, Suite 305, Roswell, Georgia, 30075.

My name is Lane Kollen. I am a Vice President and Principal of Kennedy and Associates. My business address is 570 Colonial Park Drive, Suite 305, Roswell, Georgia, 30075.

Q. MR. NEWSOME, WHAT ARE YOUR PRIMARY RESPONSIBILITIES WITH THE COMMISSION STAFF?

A. I am responsible for economic, financial, and cost of equity analyses and evaluations at the Commission.

Q. MR. HAYET AND MR. KOLLEN, WHAT ARE YOUR PRIMARY RESPONSIBILITIES WITH KENNEDY AND ASSOCIATES?

A. Mr. Hayet provides consulting services to government agencies and utility customers related to electric utility system planning, resource analyses, production cost modeling, and other utility industry policy issues.

Mr. Kollen provides consulting services to government agencies and utility customers related to electric utility, natural gas utility, water utility, and sewer utility ratemaking, accounting, finance, taxes, planning, and other policy issues.

Q. PLEASE SUMMARIZE YOUR EDUCATION AND EXPERIENCE.

A. We summarize our education, experience, professional certifications, and testimony

appearances on Exhibit STF-NHK-1, Exhibit STF-NHK-2, and Exhibit STF-NHK-3 for Mr. Newsome, Mr. Hayet, and Mr. Kollen, respectively.

Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. The purpose of our testimony is to address cost to complete (“CTC”) economic analyses and other analyses related to the Georgia Power Company’s (“Company’s”) VCM 25 filing and to provide Staff’s analysis of the rate impacts of Vogtle 3 & 4 (“the Project” or “the Units”), including the rate impacts of the Commission’s Order in Docket No. 43838 that will be effective in the month after Vogtle 3 achieves commercial operation.

II. REVIEW OF GEORGIA POWER COMPANY’S VCM 25 REPORT

Q. PROVIDE A BRIEF OVERVIEW OF THE PROJECT SCHEDULE AND COST.

A. Most recently, and subsequent to its VCM 25 Report, the Company revised commercial operation dates (“COD”) to the third quarter of 2022 for Unit 3 and second quarter of 2023 for Unit 4 in its third quarter 2021 10-Q filing with the Securities and Exchange Commission.¹ These revised commercial operation dates represent 78-month and 75-month delays for Unit 3 and Unit 4, respectively.² In contrast, the Company reported CODs of second quarter of 2022 for Unit 3 and first quarter of 2023 for Unit 4 in the VCM 25 Report.

In the same 10-Q filing, the Company revised upward the Total Project Cost to \$12.0 billion. The new Total Project Cost compared to \$6.1 billion at certification represents an increase of 96 percent.

¹ Southern Company Third Quarter 2021 10-Q, pg. 53.

² Staff interprets these in-service dates to mean the last day of the last month of the referenced quarter (September 30, 2022 for U3 and June 30, 2023 for U4). As a modeling convenience, this appears as October 1 and July 1 in Staff’s analysis.

The components of Total Project Cost are shown in the Table 1 below.

Table 1

	Capital / Construction Cost (\$ million)	Financing Cost (\$ million)	Total Project Cost (\$ million)
3Q 2021 10-Q Filing	8,785	3,194	11,979
Certification	4,418	1,695	6,113
Cost Overrun	4,367	1,499	5,866
Percent Overrun	99%	88%	96%

The values in Table 1 represent costs that have been or may be recovered from ratepayers, including costs in excess of the approved capital cost of \$7.3 billion, except for \$694 million of capital cost the Company has agreed to absorb. The values also reflect the reductions in the return on equity (“ROE”) ordered by the Commission and the Toshiba Parental Guarantee (“TPG”) payments.³

Staff has assumed the Company will seek recovery of the entire amount of the \$8,785 million of capital/construction cost. The Company states in the VCM 25 Report at page 4 that it may seek recovery of these amounts in the prudence review contemplated by the VCM 17 Order as follows:

The Company is not requesting Commission approval of these cost increases in this filing but may request that the Commission evaluate expenditures allocated from contingency for future rate recovery (excluding the \$694 million which the Company has agreed it will not seek recovery) no earlier than the prudence review contemplated by the VCM 17 Order.

³ The \$8,785 million is \$9,479 million (Company third quarter 2021 10-Q filing page 52) less \$694 million the Company has agreed to absorb. The \$3,194 million is sum of \$2,767 million (VCM 25 Report Table 1.1 page 11), \$318 million (Company third quarter 2021 10-Q filing page 52) and \$109 million (VCM 25 Report Table 1.1 page 11).

Q. BRIEFLY DESCRIBE THE CHANGES IN THE COMPANY’S ASSUMPTIONS REGARDING THE SOUTHERN COMPANY SYSTEM REFLECTED IN THE COMPANY’S VCM 25 FILING COMPARED TO THE VCM 24 FILING.

A. The Company described these changes in data response STF-217-5. The Company relied on the same fuel, load forecast, and generation technology cost assumptions as it did in the VCM 24 Report. However, the Company made changes to the capital additions costs, pre and post-in-service operation and maintenance (“O&M”) expense, decommissioning expense, PTCs, Department of Energy (“DOE”) loan savings, financing rates, nuclear fuel expense, and most notably the unit commercial operation dates and project capital cost spend curves. The Company stated in the VCM 25 Report that it used June 30, 2022 and March 31, 2023 as the commercial operation dates in its modeling for Units 3 and 4, respectively.⁴

Q. HOW MUCH HAS ALREADY BEEN SPENT ON THE PROJECT THROUGH THE END OF THE VCM 25 PERIOD?

A. Through June 30, 2021, the Company incurred \$7.8 billion of construction cost, net of the Toshiba Parental Guarantee proceeds, plus \$2.7 billion of financing cost, for a total cost of \$10.6 billion (rounded).⁵

Q. HOW MUCH REMAINS TO BE SPENT BY THE COMPANY ON THE PROJECT THROUGH THE END OF CONSTRUCTION THAT THE COMPANY MAY REQUEST RECOVERY FROM RATEPAYERS?

A. Over the remainder of the construction period, the Company estimates it will incur an additional \$1,320 million of construction and capital costs and an additional \$448 million

⁴ The Company used July 1, 2022 and April 1, 2023 for in-service dates for modeling convenience.

⁵ Table 1.1 of Georgia Power VCM 25 Report at page 11. The construction cost value of \$7.8 billion does not reflect the \$694 million of capital cost the Company has agreed to absorb so ratepayer exposure would be \$7.1 billion through June 30, 2021. The \$2.7 billion in financing cost does not include the additional \$900 million gross-up for income tax already charged to ratepayers.

of financing cost, for a total additional cost of \$1,768 million.⁶

III. STAFF ECONOMIC ANALYSES

Q. WHAT DOES STAFF'S COST TO COMPLETE ECONOMIC ANALYSES INDICATE?

A. The Staff CTC analyses, which ignore the \$10.6 billion already incurred by the Company as of June 30, 2021, indicate that it is economic *to complete* the Project *if* the Company adheres to its current construction cost forecast and the September 2022 and June 2023 COD forecasts.⁷

Q. WHY DID THE COMPANY AND THE STAFF IGNORE THE \$10.6 BILLION THE COMPANY HAS ALREADY INCURRED IN THE COST TO COMPLETE ANALYSES?

A. The purpose of a cost to complete analysis is to examine whether it is economic to finish a project, not to evaluate whether the project is economic on a total cost basis. In deciding whether to finish a project, costs already incurred are considered to be sunk and therefore are ignored because those costs exist whether or not the project is canceled. Only prospective costs – costs that can be avoided if action is taken - are considered. Normally, the closer a project is to completion, the more economic it is on a cost-to-complete basis because the remaining cost to complete a project is decreasing. In this case, where the Company is thirteen years into the Project, it should not be surprising that it appears to be more economic on a cost to complete basis to finish the Project than it is to abandon the Project and start over with construction of a natural gas-fired alternative. What is

⁶ The \$1,320 million value from Company third quarter 2021 10-Q filing page 52. The \$448 million value is calculated \$3,194 million (Table 1) – \$2,746 million (Table 1.1 of Georgia Power VCM 25 Report at page 11).

⁷ COD forecasts from Company third quarter 2021 10-Q filing page 55.

surprising is how small that benefit is compared to the significant costs incurred (and ignored in the cost to complete analysis) to get the project to this point.

Staff performed other analyses which quantify the impact of the total cost of the Units on ratepayers.

Q. DID STAFF TAKE INTO ACCOUNT THE RECENT INCREASE IN NATURAL GAS PRICES IN ITS ECONOMIC ANALYSES?

A. Yes. Staff used the same approach it has relied on in prior VCM proceedings to derive what Staff refers to as a consensus natural gas price forecasts. In deriving consensus forecasts, Staff included a recent NYMEX Henry Hub futures projection from November 15, 2021, which captures the impact of the significant increase in short-term natural gas prices that has occurred since the beginning of 2021.⁸

Q. PLEASE SUMMARIZE THE FINANCIAL IMPACT OF THE DELAYS AND COST OVERRUNS ON RATEPAYERS DURING THE CONSTRUCTION PERIOD.

A. During the construction period, the Company is currently expected to recover approximately \$4.0 billion under the Nuclear Construction Cost Recovery (“NCCR”) tariff from customers. This is nearly double the \$2.1 billion the Company would have collected if the Units had been completed in April 2016 and 2017 in accordance with the certification schedule. For the entire delay period through June 2023 ratepayers will pay an additional \$1.9 billion in NCCR revenue requirement during the construction period due to the delays and cost overruns.⁹ For a typical residential customer Staff has estimated an average of \$880 will be collected through the NCCR tariff over the construction period. This \$880

⁸ Staff only used its consensus forecast in creating its High Gas price forecast. For Low Gas and Mid Gas price forecasts, Staff’s and the Company’s forecasts were close, and therefore, Staff relied on the Company’s forecasts for those cases.

⁹ The \$1.9 billion value reflects the difference in the current estimate of the NCCR revenue requirement that customers will have to pay, which is \$4.0 billion, and the estimate of \$2.1 billion that would have been paid had the Project been completed in 2016/2017 from the original Certification.

represents an additional \$432 during the construction period compared to \$448 had the Units been completed on original certification schedule of April 2016 / 2017.

Q. PLEASE SUMMARIZE THE FINANCIAL IMPACT OF THE DELAYS AND COST OVERRUNS ON RATEPAYERS ONCE THE UNITS ARE PLACED IN COMMERCIAL OPERATION.

Once Units 3 and 4 are in commercial service, the Company may seek to include \$9.1 billion in the rate base used to calculate the base revenue requirement.¹⁰

If the entire \$9.1 billion is included in rate base, it will represent an increase of \$4.7 billion, or 107%, compared to the \$4.4 billion expected at certification, and will increase ratepayer revenue requirements by approximately \$15.6 billion over the 60-year life of the Units. This will result in an increase in annual revenue requirements of approximately, an average of \$490 million and \$460 million during the first five and ten years in operation, respectively.

The approximate impact on residential customers will be an average of \$15.40 per month and \$14.30 per month during the first five and ten years in operation, respectively.¹¹ These values are significantly larger than the \$9.60 per month than the Company claimed at certification.¹²

In conclusion, ratepayers will pay substantially more both prior to and after the Units begin providing service due to the delays and cost overruns.

Q. HOW HAVE THESE CAPITAL AND FINANCING COSTS INCREASES IMPACTED THE ECONOMIC BENEFIT OF THE UNITS FOR RATEPAYERS?

A. The cost increases have significantly reduced the economic benefit of the Units on a cost

¹⁰ This \$9.1 billion is the sum of \$8.8 billion in capital cost and \$0.3 billion deferred financing cost (AFUDC).

¹¹ These values include the impact on base rate tariff and fuel tariff. There would be an offset of approximately \$1.85 per month from lower fuel cost.

¹² Estimated Rate impact in 2018 assuming CWIP in rate base treatment. Certification Docket No. 27800, Hearing Request 1-2 (November 26, 2008)

1 to complete basis and have completely eliminated any benefit on a life-cycle cost basis.

2 The figures below are based on current assumptions and provide a comparison of the
3 cumulative revenue requirements of Vogtle 3 and 4 versus natural gas combined cycle units
4 under different assumptions about natural gas prices and carbon dioxide emission costs.¹³

5 Nominal revenue requirements are used in this analysis to indicate the impact on ratepayer
6 bills.

7 Figure 1 provides a comparison of the Vogtle 3 and 4 revenue requirements to natural gas
8 combined cycle units for the Low Natural Gas price forecast. The Vogtle Units 3 and 4
9 cumulative nominal revenue requirement exceeds the combined cycle cumulative nominal
10 revenue requirement under all three carbon dioxide (CO₂) emission price forecasts.

¹³ These results are based on Staff's Aurora cases using Staff's gas price forecast and CO₂ forecast assumptions, and include combinations of Low, Mod, and High gas forecasts, and \$0/Ton, \$10/Ton, and \$20/Ton CO₂ forecasts.

Figure 1

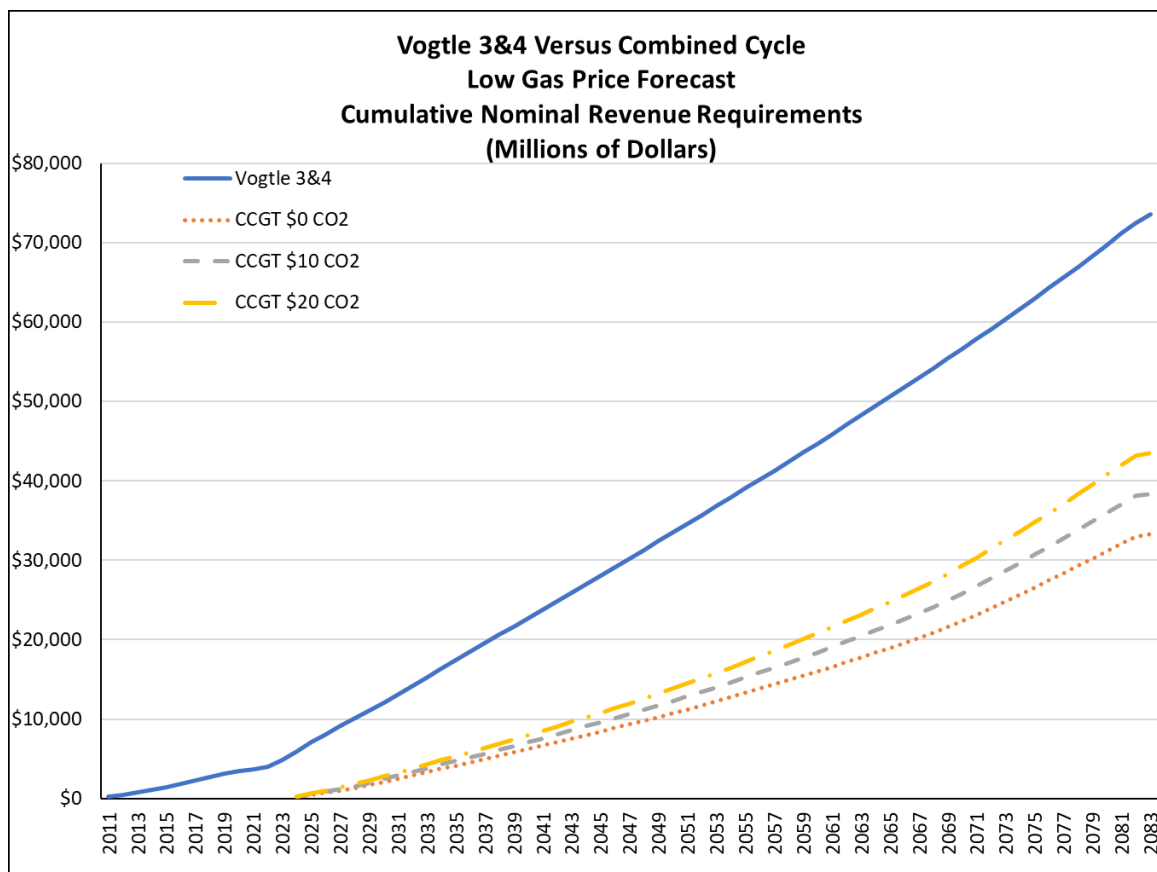

Figure 2 provides a comparison for the Moderate Natural Gas price forecast. The Vogtle Units 3 and 4 cumulative nominal revenue requirement exceeds the combined cycle cumulative nominal revenue requirement under all three CO₂ emission price forecasts.

Figure 2

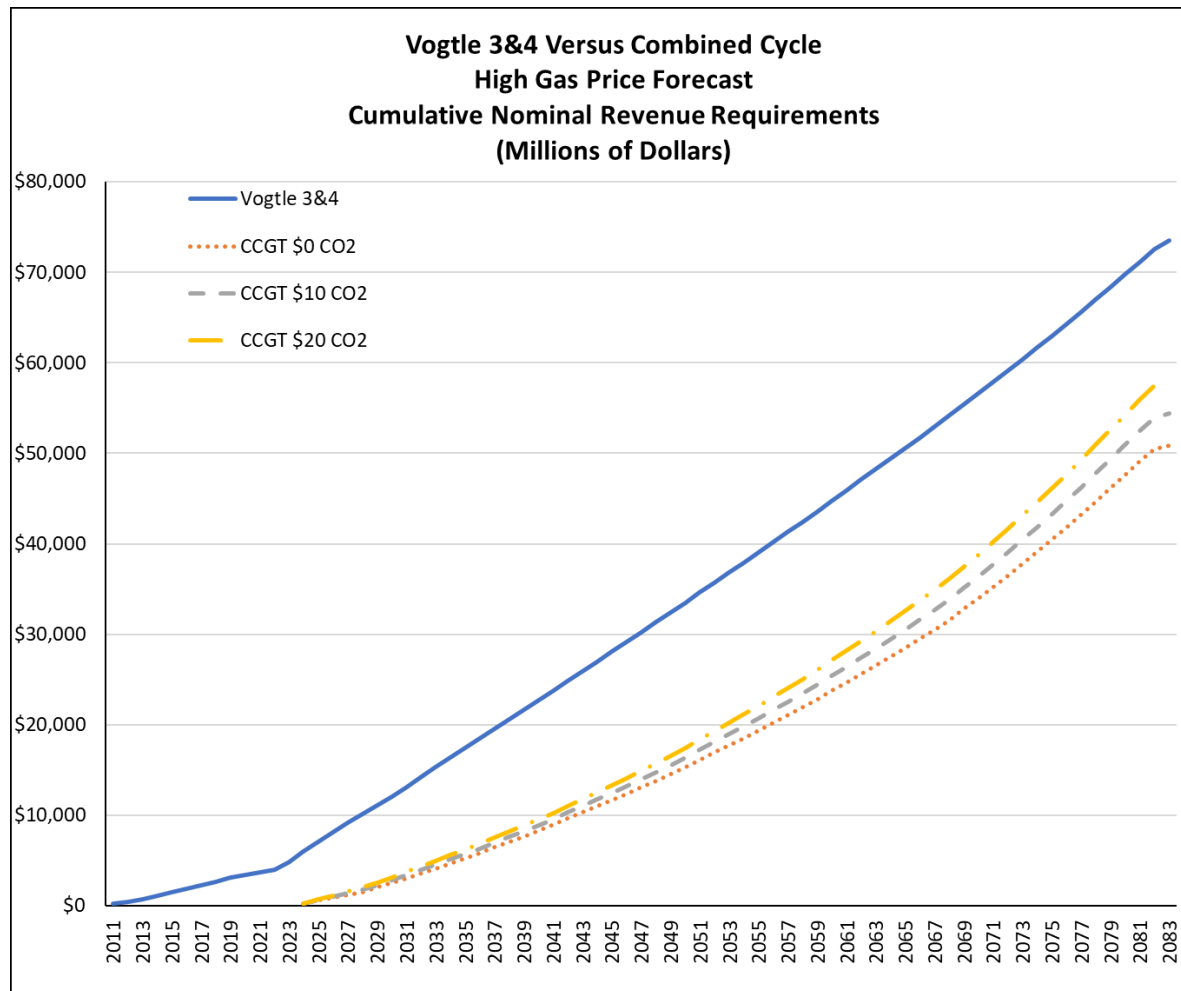

Figure 3 provides a comparison for the High Natural Gas price forecast. The Vogtle Units 3 and 4 cumulative nominal revenue requirement exceeds the combined cycle nominal revenue requirement under all three CO₂ emission price forecasts.

Figure 3

Q. PLEASE SUMMARIZE THE RESULTS OF THE THREE GRAPHS.

A. The revenue requirements of Vogtle 3 & 4 in nominal dollars significantly exceed that of natural gas combined cycle units over the entire 60-year operating life under all natural gas price and carbon dioxide emission price scenarios.

Q. WHAT DO THE RESULTS OF A TRADITIONAL ECONOMIC ANALYSIS USING PRESENT VALUE DOLLAR RESULTS INDICATE?

1 A. The revenue requirements for Vogtle 3 and 4 in cumulative present value dollars are greater
2 than the revenue requirements for the combined cycle unit alternative in every year in all
3 nine of the natural gas price and CO₂ emission price cases.

4 **Q. WHAT IS THE REVENUE REQUIREMENT IN DOLLARS PER MEGAWATT**
5 **HOURS OF VOGTLE 3 AND 4 VERSUS A COMBINED CYCLE UNIT?**

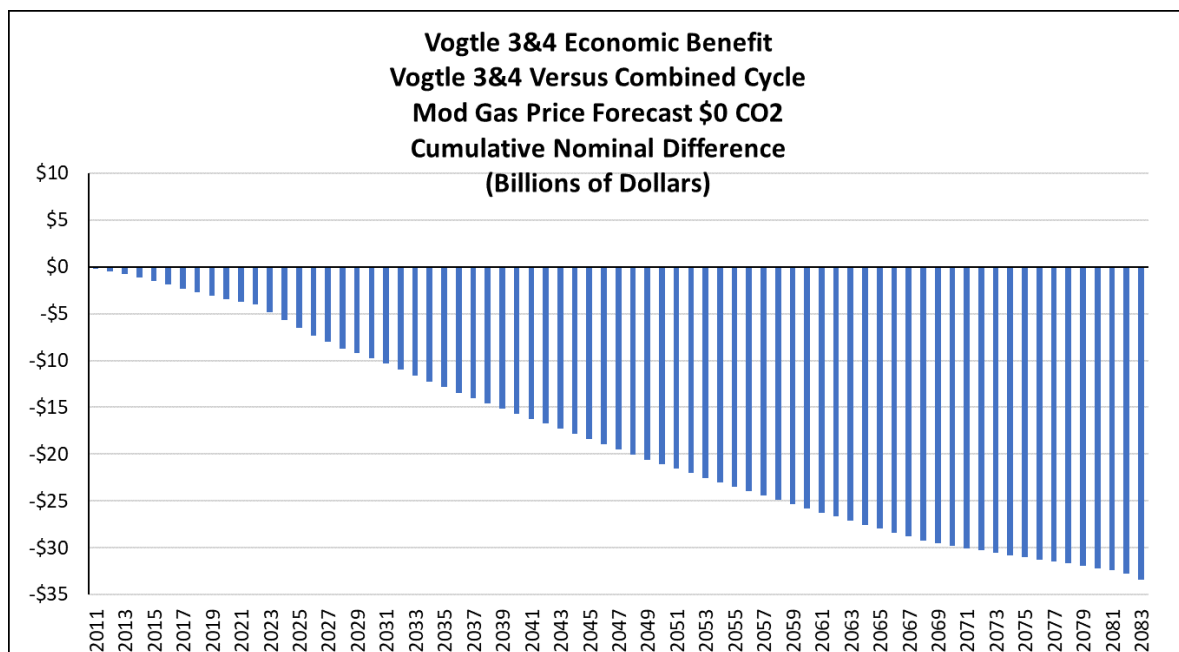

6 A. Staff estimates the total average dollars per megawatt hour revenue requirement of Vogtle
7 3&4 to be approximately \$150/MWh compared to \$80/MWh for the combined cycle unit
8 based on the Mod gas \$0/Ton CO₂ forecast.¹⁴

9 **Q. WHAT IS THE ECONOMIC BENEFIT OF VOGTLE UNITS 3 AND 4 OVER**
10 **ENTIRE PROJECT LIFE CYCLE?**

11 A. The bar graph below illustrates the cumulative economic benefit of Vogtle Units 3 and 4
12 over project life cycle based on the Mod gas \$0/Ton CO₂ forecast. During the construction
13 period the cumulative negative economic benefit increases as financing costs are recovered
14 from ratepayers under the Nuclear Construction Cost Recovery (“NCCR”) tariff. The
15 cumulative negative economic benefit continues to increase during operating life as the
16 revenue requirement of Vogtle Units 3 and 4 significantly exceeds alternative combined
17 cycle unit.

¹⁴ Computed from the Cumulative Revenue Requirements used to derive Figure 2, and the total energy produced by Vogtle Units 3 and 4 over their 60 year lives.

Figure 4

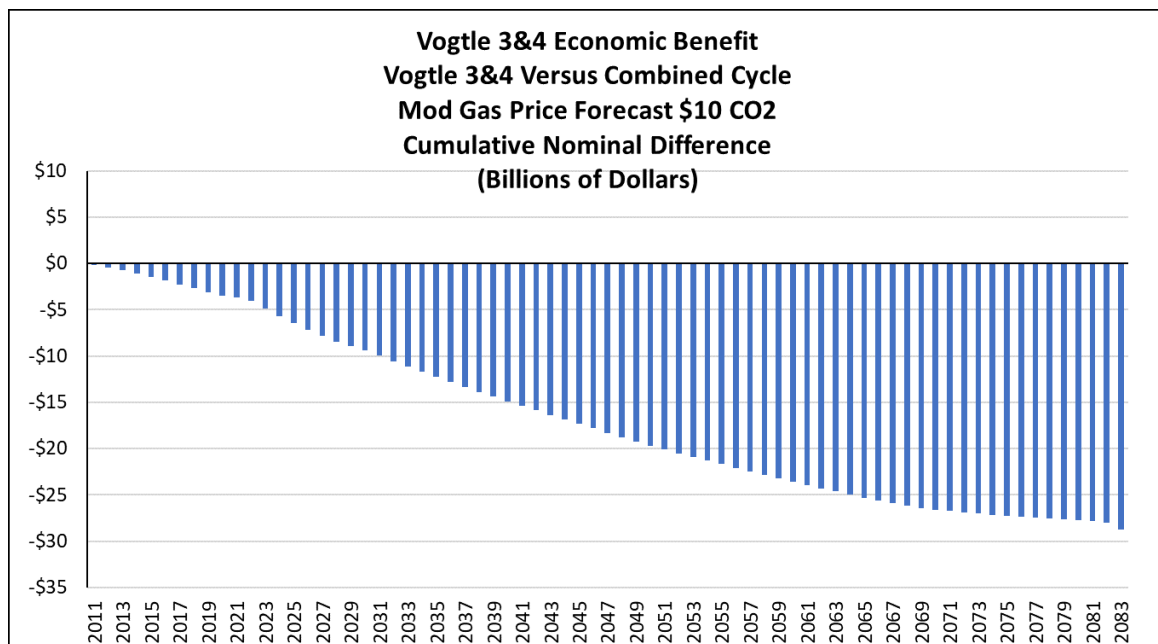

In summary, the Vogtle 3 & 4 revenue requirement exceeds the alternative combined cycle resource in every year and ratepayers will pay an additional \$33 billion over the Units' lifecycle (construction period and 60-year operating life) versus alternative combined cycle generation under mod gas and zero carbon dioxide emission price scenario.

Q. IF A CARBON DIOXIDE EMISSION CHARGE IS ASSUMED DO THE VOGTLE UNITS BECOME LOWER COST THAN ALTERNATIVE COMBINED CYCLE GENERATION OVER THE UNITS' LIFECYCLE?

A. No. Even assuming a price on carbon dioxide emissions, the cumulative revenue requirement of Vogtle Units 3 and 4 significantly exceeds the alternative combined cycle unit on a lifecycle basis.

Figure 5

Ratepayers will pay an additional \$29 billion over the Units' lifecycle (construction and 60-year operating life) versus alternative combined cycle generation under the mod gas and \$10/Ton carbon dioxide emission price scenario. The Vogtle 3 & 4 revenue requirement exceeds alternative combined cycle generation in nearly every year. In summary, carbon dioxide emission charges do not make the Units economic and the Units are still significantly uneconomic versus alternative combine cycle generation.

Q. WHAT OTHER COMPANY ANALYSES DID STAFF REVIEW?

A. In its VCM 25 Report, the Company provided a "Replacement Energy Cost and Deferred Operating Cost" table (Table 1.2), which purports that through the end of the VCM 25 period, the delay of the new Vogtle units has so far only resulted in a net cost of \$97 million to customers. As described in Staff's prior testimony, the premise underlying the table is fundamentally flawed as the Company ignores the additional \$1.5 billion of financing cost recovered from ratepayers during the delay period that would have not been collected had

the Units been completed on time.¹⁵ Furthermore, as discussed below, Table 1.2 is also flawed because the analysis improperly depicts the timing when operating expenses and PTC benefits will be incurred, which leads to the inaccurate conclusion that customers will only be harmed by \$97 million during the delay period.

Q. WHY DID THE COMPANY PROVIDE TABLE 1.2 IN THE VCM 25 REPORT?

A. The Commission adopted Staff's VCM 12 recommendation requiring the Company to implement a mechanism to keep track of replacement fuel costs stemming from the delay. The Company also provided certain supplemental information in addition to the required replacement fuel cost, which is addressed below.

Q. ARE RATEPAYERS BEING HARMED BY THE REPLACEMENT ENERGY COST INCURRED BY THE COMPANY DURING THE DELAY PERIOD?

A. Yes. If the Units were in operation the greater replacement fuel costs would not have been incurred by the Company and ratepayers would have been subject to smaller fuel cost recovery charges on their bills during the delay period.¹⁶ Staff estimates that total replacement fuel cost for the 6.5 year delay period through 2023 will be approximately \$1.0 billion.

Q. WHAT IS THE DIRECT IMPACT ON RATEPAYERS' BILLS FROM THE DELAYS THROUGH THE END OF THE VCM 25 PERIOD?

A. For the delay period through June 30, 2021, ratepayers have paid an additional \$1.5 billion in NCCR tariff revenues and \$675 million in fuel replacement cost for a total of approximately \$2.2 billion. This \$2.2 billion represents the direct impact on ratepayers and is significantly greater than the \$97 million shown in Table 1.2.

¹⁵ The \$1.5 billion is difference between the \$3.6 billion collected through June 30, 2021, less the approximately \$2.1 billion if the Units had been completed on certification CODs of April 2016 and 2017.

¹⁶ Staff acknowledges that the Units' fuel savings may be greater over the operating period of 2022 – 2083 than the certification operating period of 2016 – 2077. The incremental fuel savings from 2077 – 2083 does not compensate ratepayers for the additional \$1.0 billion in fuel replacement cost being paid by ratepayers during the delay period.

When the proper analysis is performed, during the delay period of 2016 through 2023, Staff estimates the Company will collect \$2.9 billion more from ratepayers due to the increase in NCCR tariff collections (\$1.9 billion) and higher fuel charges (\$1.0 billion) than what would have been collected had the Units been completed on time.

Q. WHAT OTHER REASONS IS TABLE 1.2 FUNDAMENTALLY FLAWED?

A. Another reason Table 1.2 is flawed is that it mischaracterizes the deferral of certain costs as savings to ratepayers and misrepresents when costs will be incurred. As discussed above customers are incurring replacement power costs and additional financing costs through the NCCR tariff during the delay period. Customers will still incur operating benefits and costs (PTCs, O&M, Depreciation, and Ad Valorem costs) once the Units go into service and these benefits and costs do not represent offsets to replacement fuel cost during the construction delay period. These operating expenses and PTC benefits will occur, though they will be delayed until the Units go into service. There will be no savings as the Company represented in Table 1.2, as the costs are simply delayed until the Units are placed in service. The harm of the delay is \$2.2 billion through June 30, 2021, as discussed above, not a net cost to customers of just \$97.4 million as represented in the Table 1.2.

IV. RATEMAKING ISSUES

Q. HOW DID THE COMPANY'S MATERIALLY INACCURATE COST ESTIMATES IMPACT STAFF'S ECONOMIC ANALYSES AND RECOMMENDATIONS AT CERTIFICATION AND EACH VCM PROCEEDING?

A. The Company grossly under-estimated the costs of Vogtle 3 and 4 in its filings and testimony to the Commission during at least the first twelve years of the Project. The Company has provided ten cost estimates (certification and nine revisions) over the life of

the Project and at least the first nine were materially inaccurate. Due to the fact that the Company provided inaccurate cost information, both the Company's and the Staff's economic analyses, conclusions and recommendations were inaccurate. A fundamental responsibility of Company management is to provide accurate cost estimates which it failed to do during at least the first twelve years of the Project. The materially inaccurate cost estimates are an example of management's continuous poor judgement over the life of the Project that should be taken into account when the Company seeks recovery of cost overruns.

Q. YOU NOTED PREVIOUSLY THAT THE COMPANY STATES THAT IT MAY SEEK RECOVERY OF THE CONSTRUCTION/CAPITAL COSTS IN EXCESS OF THE APPROVED \$7.3 BILLION CAPITAL COST AS EARLY AS THE PRUDENCE REVIEW CONTEMPLATED BY THE VCM 17 ORDER. DO YOU HAVE ANY COMMENTS?

A. Yes. First, Staff plans to conduct an extensive prudence review. The prudence review is not limited to a review of costs above \$7.3 billion. There has been no determination of prudence on any costs over \$3.5 billion. Costs between \$3.5 billion and \$5.68 billion are only presumed prudent and the burden to show imprudence is on parties other than the Company. Costs above \$5.68 billion are not presumed prudent and the burden to prove that they are prudent is on the Company.¹⁷ Costs above \$7.3 billion are not presumed prudent or reasonable and the burden to prove both is on the Company. Further, the Commission can review financing costs in the prudence review, even financing costs that have already been recovered from ratepayers. The only financing costs that have been deemed prudent are those incurred through the NCCR prior to December 31, 2019 for Unit 3 and December 31, 2020 for Unit 4.¹⁸

Second, Staff has assiduously documented the Company's management failures that have

¹⁷ See Para 1, 4, and 5 of the [Stipulation](#) in the Supplemental Information Review.

¹⁸ See Paragraph 8 of the [Stipulation](#) in the Supplemental Information.

1 resulted in multi-year schedule delays and multibillion-dollar cost increases. These failures
2 have contributed not only to the construction/capital cost increases in excess of the
3 approved costs, but also to the cost increases in excess of the deemed prudent costs. The
4 construction/capital cost increases and schedule delays also have contributed to the
5 increase in financing costs recovered through the NCCR tariff, which has compounded the
6 harm to ratepayers from the Company's delays and cost increases.

7 Third, the Staff panel of Steve Roetger, Bill Jacobs, and Don Grace provides an overview
8 of the Company's project management failures that Staff likely will address in greater
9 detail in the prudence review.

10 **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

11 **A. Yes.**

COMPANY'S TWENTY-FIFTH SEMI-
ANNUAL VOGTLE CONSTRUCTION
MONITORING REPORT**

DOCKET NO. 29849

EXHIBIT
STF-NHK-1

Summary of Educational and Professional Experience of Tom J. Newsome

Mr. Newsome received a Bachelor of Chemical Engineering with certificates in Pulp & Paper and Polymers from the Georgia Institute of Technology in June 1986. In 1994, Mr. Newsome passed both required examinations and received a professional engineering license (PE) from the State of North Carolina. Mr. Newsome received a Master of Science in Business Economics and a Master of Science in Finance from Georgia State University in August 1996 and June 1997, respectively. Mr. Newsome is the recipient of the George J. Malanos Graduate Award for Academic Excellence for completing the finance program with a 4.0 grade-point average. In 2003, Mr. Newsome received Chartered Financial Analyst (CFA) designation from the CFA Institute after successfully completing three six-hour examinations on security analysis and portfolio management.

After graduation from Georgia Tech, Mr. Newsome worked as plant/process engineer for Shaw Industries, a carpet manufacturer. In April 1988, Mr. Newsome joined Weatherly, Inc., engineering and construction firm specializing in fertilizer plants, as a process engineer. Mr. Newsome's primary responsibilities were process design and plant start-ups, including start-ups in Korea and India. Mr. Newsome joined Midrex Direct Reduction Corp., an applied research, engineering and construction firm with proprietary iron ore processing plant technology in March 1993 as a process engineer. Mr. Newsome's duties were similar to those at Weatherly, including assisting in the start-up of the world's largest Direct Reduction Iron plant in India.

Following graduation from graduate school at Georgia State, Mr. Newsome joined Georgia Gulf Corporation in 1997 as a corporate development analyst. While at Georgia Gulf, Mr. Newsome performed financial analysis and modeling for natural gas purchasing/hedging program, developed a "make-or-buy" model for methanol business, performed financial modeling for an acquisition, and calculated and summarized the financial performance of prior capital investments. In 1999, Mr. Newsome joined FMV Opinions, Inc. as a business valuation analyst and valued private companies for gift and estate tax, transactional and management planning purposes.

Mr. Newsome joined the Georgia Public Service Commission ("Commission") in January 2005 as a Financial Analyst/Economist. Mr. Newsome was promoted to Director of Utility Finance in 2008.

Mr. Newsome has testified in eighteen Georgia Power Company ("Company" or "Georgia Power") proceedings before the Commission. Mr. Newsome's most recent testimony was in Docket 29849 23rd Vogtle Construction Monitoring ("VCM") and 24th VCM on Vogtle economics. Prior to that was testimony in 22nd VCM and in Docket 43011 Fuel Cost Recovery (FCR-25) on the Company's hedging program and certain other issues. Prior to that Mr. Newsome testified in Docket 29849 20th / 21st Vogtle Construction Monitoring ("VCM") on Vogtle economics. Prior to that Mr. Newsome testified in Docket 42310 Georgia Power Company's 2019 Integrated Resource Plan on supply side and certain other issues. Prior to that testimony Mr. Newsome testified in Docket 29849 19th Vogtle Construction Monitoring ("VCM"), 18th VCM and 17th VCM on the economics of continuing Vogtle 3 and 4 construction and provided the Commission policy

recommendations to protect ratepayers. Prior to testifying in the 17th VCM Mr. Newsome testified in the 2016 Integrated Resource Plan on the Company's requested to capitalize cost for investigation of new nuclear units. Mr. Newsome's testified in Docket No. 39638 Fuel Cost Recovery (FCR-24) on the Company's natural gas hedging program. In Docket No. 22403, Mr. Newsome addressed Georgia Power Company's natural gas hedging program and in Docket No. 24506 Mr. Newsome testified on the application of AFUDC accounting for calculating financing cost of capital projects. In Docket No. 27800, Certification of Plant Vogtle Expansion, Mr. Newsome addressed the sources, impact and mitigation of financial risk from the construction and operation of new nuclear units at Plant Vogtle. Mr. Newsome testified in Docket No. 29849 concerning Georgia Power's First Semi-annual Construction Monitoring Report on Plant Vogtle expansion. Mr. Newsome evaluated the economic analysis performed by Georgia Power and developed Staff's own independent economic and risk analysis of the Project. In the Second Vogtle Semi-annual hearing, Mr. Newsome testified on the Company's proposal to change how escalation on certain project cost was calculated (Amendment 3). In the Third Vogtle Semiannual hearing and in separate proceeding, Adoption of a Risk Sharing Mechanism, Mr. Newsome testified on Staff's revised risk sharing mechanism for Vogtle 3 & 4. In Docket No. 28945 Fuel Cost Recovery FCR-21, Mr. Newsome testified on seasonal rates. Mr. Newsome also presented cost of equity testimony in Atmos Energy Corporation's Rate Case in Docket No. 30442 and Generic Proceeding to Implement House Bill 168 (small telephone companies) in Docket No. 32235 in 2011 and 2018. Mr. Newsome provided testimony before the Commission in Georgia Power's 2013 Base Rate Case in Docket No. 36989 on the Company's projected cost of debt for 2014 – 2016. Mr. Newsome's primarily responsibility, prior to presenting testimony in these dockets, has been performing analyses of the parties' cost of equity capital positions in Docket Nos. 18638 (Atlanta Gas Light Company 2004/2005 Rate Case), 19758 (Savannah Electric and Power Company 2004 Rate Case), 20298 (Atmos Energy Corporation - Georgia Division 2005 Rate Case), 25060 (Georgia Power Co. 2007 Rate Case) and 27163 (Atmos Energy Corporation - Georgia Division 2008 Rate Case) and developing the Advisory PIA Staff's cost of equity recommendation to the Commission.

EXPERIENCE

Since completing his Master's program, Mr. Hayet worked for fifteen years at Energy Management Associates, now Ventyx, providing consulting services and client service support to electric utility companies for the widely used planning models, PROMOD IV and STRATEGIST. Mr. Hayet had an instrumental role in designing some of the modeling features of those tools including the competitive market modeling logic in STRATEGIST.

In 1995, Mr. Hayet formed the utility consulting firm, Hayet Power Systems Consulting ("HPSC"), and worked for customers in the United States, and internationally in Australia, Japan, Singapore, Malaysia, the United Kingdom, and Vietnam. Mr. Hayet provided consulting services to Public Utility Commissions, Regional Power Pools, State Energy Offices, Consumer Advocate Offices, Electric Utilities, Global Power Developers, and Industrial Companies. Mr. Hayet's expertise covers a number of areas including utility system planning and operations, RTO analysis, market price forecasting, Integrated Resource Planning, renewable resource evaluation, transmission planning, demand-side analysis, and economic analysis.

In 2000, Mr. Hayet also joined the consulting firm of J. Kennedy & Associates, Inc. ("Kennedy and Associates") and assisted on projects that required utility resource planning, analysis, and software modeling expertise. Mr. Hayet merged his firm and became a Vice-President and Principal of Kennedy and Associates in 2015.

Mr. Hayet has conducted numerous consulting studies in the areas of RTO Cost/Benefit Analysis, Renewable Resource Evaluation, Renewable Portfolio Standards Evaluation, Electric Market Price Forecasting, Generating Unit Cost/Benefit Analysis, Integrated Resource Planning, Demand-Side Management, Load Forecasting, Rate Case Analysis and Regulatory Support.

2000 to **J. Kennedy and Associates, Inc.**
Present: **Vice President and Principal**

- Initially began as Director of Consulting, became Vice President and Principal in 2015
- Managed electric related consulting projects.
- Responsible for business development.
- Clients include Staffs of Public Utility Commissions and other State Agencies, State Energy Offices, Global Power Developers, and Industrial Groups, and large energy users.

**1996 to Present: Hayet Power Systems Consulting
President and Principal**

- Managed electric utility related consulting projects
- Clients include Staffs of Public Utility Commissions and other State Agencies, State Energy Offices, Global Power Developers, and Industrial Groups, and large energy users.

**1991 to 1996: EDS Utilities Division, Atlanta, GA (Now Ventyx)
Lead Consultant, PROSCREEN (Now STRATEGIST) Department**

- Managed a client services software team that supported approximately 75 users of the STRATEGIST electric utility strategic planning software.
- Participated in the development of STRATEGIST's competitive market modeling features and the Network Economy Interchange Module
- Provided client management direction and support, and developed new consulting business opportunities.
- Performed system planning consulting studies including integrated resource planning, DSM analysis, marketing profitability studies, optimal reserve margin analyses, etc.
- Based on experience with PROMOD IV, converted numerous PROMOD IV databases to STRATEGIST, and performed benchmark analyses of the two models.

**1988 to 1991: Energy Management Associates (EMA), Atlanta, GA
Manager, Production Analysis Department**

- Served as Project Manager of a database modeling effort to create an integrated utility operations and generation planning database. Database items were automatically fed into PROMOD IV.
- Supervised and directed a staff of five software developers working with a 4GL database programming language.
- Interfaced with clients to determine system software specifications, and provide ongoing client training and support

1980 to **Energy Management Associates (EMA), Atlanta, GA**
1988: **Senior Consultant, PROMOD IV Department**

- Provided client service support to EMA's base of over 70 electric utility customers using the PROMOD IV probabilistic production cost simulation software.
- Provided consulting services in a number of areas including generation resource planning, regulatory support, and benchmarking.

ADDITIONAL JUDICIAL PROCEEDINGS AND OTHER PROJECT INFORMATION

- 1995 – 2000 - Modeled the Singapore Power Electricity System and analyzed the benefits of dispatching a new oil-fired unit within the system, BHP Power
- 1995 – 2000 - Modeled the Australian National Energy Market to develop market based energy price forecasts on behalf of an Independent Power Producer in Australia, BHP Power
- 1995 – 2000 - Analyzed the benefit of purchasing existing gas-fired steam turbine units within the Australian market, BHP Power
- 1995 – 2000 Developed market price forecasts for South Australia as part of the evaluation of a new gas fired combined cycle unit, BHP Power
- 1995 – 2000 - Modeled the Vietnam Electricity System as part of a project to develop Least Cost Expansion plans for Vietnam, EVN State Utility

- 1995 – 2000 - Assisted in the evaluation of Phu My CCGT power plant in Vietnam, BHP Power
- 1995 – 2000 - Assisted in the development of Market Price Forecasts in several regions of the US. These forecasts were used as the basis for stranded cost estimates, which were filed in testimony in a number of jurisdictions across the country.
- 1995 – 2000 - Conducted research regarding ISO Tariffs and Operations for the PJM Power Pool, the California ISO, and the Midwest ISO on behalf of a Japanese Research.
- 1995 – 2000 - Performed research on numerous electric utility issues for 3 Japanese research organizations. This was primarily related to deregulation issues in the US in anticipation of deregulation being introduced in Japan.
- 1995 – 2000 - Critiqued the IRP filings of 5 utilities in South Carolina on behalf of the South Carolina State Energy Office
- 1999 - Helped to analyze the rate structure and develop an electricity price forecast for the Metropolitan Atlanta Rapid Transit Authority (MARTA) in Atlanta, Georgia
- August 2002 – Expert Report, Civil Action No. 1:00-cv-1262 in the United States District Court for the Middle District of North Carolina, United States v. Duke Energy Corporation, Department of Justice
- 2002 - Worked on behalf of the Utah Committee of Consumer Services to provide guidance and assist in the analysis of PacifiCorp's 2002 Integrated Resource Plan.
- July 2003 - Worked on behalf of the Oregon Public Utility Commission to Audit PacifiCorp's Net Power Costs per a Settlement Agreement accepted by the Public Utility Commission of Oregon in its Order No. 01-787. Audit report in Docket No. UE-116 filed July 2003.
- 2003 - Regulatory support to the Utah Committee of Consumer Services regarding PacifiCorp's 2003 Utah General Rate Case Docket # 03-2035-02.
- 2004 – Assistance to the Utah Committee of Consumer Services to analyze a series of power purchase agreements and special contracts between PacifiCorp and several of its industrial customers.
- 2005 - Worked on behalf of the Utah Committee of Consumer Services to help analyze PacifiCorp's restructuring proposals.
- 2005 - Assisted the Utah Committee of Consumer Services by evaluating PacifiCorp's 2005 IRP and assisted in writing comments that were filed with the Commission.
- 2007 - Assisted the Utah Committee of Consumer Services to evaluate PacifiCorp's 2007 IRP.
- 2007 - Conducted an investigation of the Southern Company interchange accounting and fuel accounting practices on behalf of the Georgia Public Service Commission Staff (Docket 21162-U).

- 2008 - Assisted the Louisiana Public Service Commission Staff with the review and evaluation of Cleco Power's 2008 Short Term RFP and its 2010 Long-Term RFP.
- 2008 - Assisted the Utah Committee of Consumer Services by participating in a collaborative process to develop an avoided cost tariff for large QFs.
- 2008 - Assisted the Louisiana Public Service Commission Staff with a rulemaking for the opportunity to implement a Renewable Portfolio Standard in Louisiana. (Docket No. R-28271 Sub-Docket B)
- April 2011 – Initial Expert Report, Civil Action No. 2:10-cv-13101-BAF-RSW, on behalf of the Department of Justice in US District Court, United States v. Detroit Edison
- June 2011 – Rebuttal Expert Report, Civil Action No. 2:10-cv-13101-BAF-RSW, on behalf of the Department of Justice in US District Court, United States v. Detroit Edison
- 2011 - Assisted the Georgia Public Service Commission Staff to investigate the acquisition of additional coal and combustion turbine capacity currently wholesale capacity (Docket 26550).
- 2012 - Assisted the Louisiana Public Service Commission Staff with a rulemaking to design Integrated Resource Planning ("IRP") rules. (Docket No. R-30021)
- December 2013 – Expert Report, Civil action no. 4:11-cv-00077-RWS, on behalf of the Department of Justice in US District Court, United States v. Ameren Missouri.

Mr. Kollen has more than thirty years of utility industry experience in the financial, rate, tax, and planning areas. He specializes in revenue requirements analyses, taxes, evaluation of rate and financial impacts of traditional and nontraditional ratemaking, utility mergers/acquisition and diversification. Mr. Kollen has expertise in proprietary and nonproprietary software systems used by utilities for budgeting, rate case support and strategic and financial planning.

QUALIFICATIONS OF LANE KOLLEN

EXPERIENCE

1986 to

Present: **J. Kennedy and Associates, Inc.:** Vice President and Principal. Responsible for utility stranded cost analysis, revenue requirements analysis, cash flow projections and solvency, financial and cash effects of traditional and nontraditional ratemaking, and research, speaking and writing on the effects of tax law changes. Testimony before Connecticut, Florida, Georgia, Indiana, Louisiana, Kentucky, Maine, Maryland, Minnesota, New York, North Carolina, Ohio, Pennsylvania, Tennessee, Texas, West Virginia and Wisconsin state regulatory commissions and the Federal Energy Regulatory Commission.

1983 to

1986: **Energy Management Associates:** Lead Consultant.
Consulting in the areas of strategic and financial planning, traditional and nontraditional ratemaking, rate case support and testimony, diversification and generation expansion planning. Directed consulting and software development projects utilizing PROSCREEN II and ACUMEN proprietary software products. Utilized ACUMEN detailed corporate simulation system, PROSCREEN II strategic planning system and other custom developed software to support utility rate case filings including test year revenue requirements, rate base, operating income and pro-forma adjustments. Also utilized these software products for revenue simulation, budget preparation and cost-of-service analyses.

1976 to

1983: **The Toledo Edison Company:** Planning Supervisor.
Responsible for financial planning activities including generation expansion planning, capital and expense budgeting, evaluation of tax law changes, rate case strategy and support and computerized financial modeling using proprietary and nonproprietary software products. Directed the modeling and evaluation of planning alternatives including:

Rate phase-ins.
Construction project cancellations and write-offs.
Construction project delays.
Capacity swaps.
Financing alternatives.
Competitive pricing for off-system sales.
Sale/leasebacks.
