Dear Shari Heino:

Recently, a safety evaluation was conducted of pipeline facilities operated by your company. These facilities are identified in the attached Safety Evaluation Summary. Safety evaluations are conducted in accordance with pipeline safety requirements of the Texas Utilities Code, Section 121.201 for natural and other gas pipeline facilities and TEX. NAT. RES. CODE, Sections 117.001 and 117.011 (Vernon Supp. 2002) for hazardous liquid pipeline facilities.

During the evaluation, selected physical conditions, written procedures, and records were reviewed. At the time of this evaluation, no alleged violations of the applicable safety regulations were found in the areas reviewed.

Your efforts to maintain the pipeline facilities have resulted in this favorable report. We appreciate the assistance given during the investigation. If you have any questions, please do not hesitate to contact the Oversight and Safety Division by email at safety@rrc.texas.gov or by phone at 512-463-7058.

Sincerely,

A handwritten signature in black ink that reads "Steph Weidman".

Important Note: The pipeline system(s) listed above are identified by a number and name and represent the physical pipe, valves and other components operated by your company. Additionally, there may be a pipeline system listed that is named System of Company ID Number where number is the identification number of your company. This system is used to represent your company and does not represent any physical pipeline system. For internal purposes it allows the Commission to more properly record inspection work performed at the company level. Where deficiencies are found in programs, plans, procedures, and records at the company level and are not with a specific physical system, alleged violations will be cited against the System of Company ID Number.
