We don't have any more comments. I have opened ROCIS so OP can go ahead and upload the clean versions of the final documents. In the meantime, I will check with my front office to make sure we have green light to conclude our review.

Subject: [WARNING: UNSCANNABLE EXTRACTION FAILED]MATS Package 09/21/2021 versions

Vlad,

Attached are RLSO versions of the DRAFT MATS NPRM and the Cost TSD [there were no edits to the previously submitted version of the Benefits TSD]. The documents address the second round of interagency comments as well as incorporate some additional EPA-suggested clarifying edits.

One thing that I'd like to point out ... in both the DRAFT NPRM and the Cost TSD you'll see that the results of the retrospective analysis of control costs changed a relatively small amount due to a final review of data and analysis. With the updates to the calculations, we project that we overestimated annual compliance costs by at least \$2.2 to \$4.4 billion per year (compared to the previous estimate of \$1.7 to \$3.9 billion per year).

If you have any questions, let me know.

Nick
