

THE ULTIMATE
SURFACE EXPERIENCE

October 25, 2019

To Whom it May Concern:

We are aware of media reports around the potential presence of trace amounts of PFAS chemicals in some artificial turf fields. In light of these reports, we have worked closely with our supplier of artificial turf filaments to **verify that our products do not contain these chemicals. Our supplier has confirmed that their products are free of PFAS, PFOS and fluorine.** We care deeply about the safety of our surfaces and those who use them and we will continue to vigilantly monitor our products to ensure that they remain free of these substances.

Regards,

Darren Gill
Senior Vice-President of Marketing & Innovation
