<p>8. Intelligence Report</p> <p>While currently there are no known active threats against the Washington Metropolitan Area (WMA), the overall threat picture for the area remains unstable. During 'normal times', the WMA remains a highly valued target due to the area's iconic landmarks of national and historic significance. However, these are not 'normal times.' The COVID-19 pandemic continues to impact every member of society, raising stress and anxiety levels of individuals throughout the nation. The U.S. Park Police Intelligence and Counterterrorism Branch (ICTB) has noted a rise in social media postings calling for individuals to take action against multiple perceived injustices being forced onto people due to the pandemic. Calls for action are being voiced by individuals and groups that self-identify as originating from all sides of the political and social landscape.</p>
