Hi Jack, Thanks for your message.

Good idea. Perhaps PHU call a good vehicle? Sharing with our new EPA PHU liaison Kelly O'Neal who joined yesterday and is getting up to speed.

I got an email request from Gooch last Monday with a Request for Status on Validating Handheld Air Monitoring Devices for Butyl Acrylate. I've been working to get clear and accurate information to respond to this. I joined the response as deputy ENV March 13 and trying to understand the history. I spoke with Gooch this morning and learned that a request had been made previously and there had been discussion with EPA but from the RFI I got and discussions I've been part of this is seems to be still outstanding. I've elevated this issue and trying to facilitate. I appreciate the frustration with the communication challenges. I'll be on this afternoon's PHU call and be happy to discussion. This is important and I want to contribute to a resolution.

Scott

Subject: issue

I was just on the Command and General Staff call.
Sharon was on and expressed a need to know more about the butyl acrylate detection issue.
There was a long discussion on this issue yesterday at a special UC 2:00 pm meeting.
Jill and Karl were on the call as well as EPA regional toxicologists, ORD toxicologists, NS and consultant toxicologists/industrial hygienists.

It sounds to me that Sharon could use an update. Jill is likely interested also.
Sharon mentioned that ODH likely interested too.

Should we try to set up a call? Unfortunately I need to head to a meeting with PA farmers around 12:30 pm
