Subject: RE: [External] RE: First draft of n-butyl acrylate discussion
Attachment: Butyl Acrylate Discussion V2.docx

Jack,

I think the thought is that this comes out from EPA/CDC and/or UC, yes. We kind of got the sense that if we drafted, it would be a huge benefit, and so we took the ball and ran with it.

However, I also think that Pa. agencies are prepared to share the message on our own if we don't get some assurances that this is a priority and plans are in place to finalize a draft and message this.

The last thing we want is for the information to get out from sources not part of the response.

Here is an updated version, with edits from Bob and Karl at ATSDR R3.

More than willing to discuss with individuals to get this moving forward.
Nate

Thanks for this, Nate.

Just got out of the morning meetings. I am here with Brian Moore.

No secret this will create a stir here in Columbiana. The whole thing about messaging as a unit. I believe Unified Command would want to present the message....no secret there either.but, no doubt a State/Commonwealth can do as it believes.

Can I have Jenna and Matt come in to my trailer to take a look and discuss with you? Not a large group but maybe the folks on this email, Brian and I?

The only thing I think there is still some question aboutwas BA detected and at what level?
I also believe there is a place for odor detection criteria by multiple home screeners that might temper this message a bit.

....although I realize some may look at human odor detection as a subjective, not very convincing evaluation tool.

Subject: First draft of n-butyl acrylate discussion

Ann and Jack,

Please see the attached first draft from PA DOH on the n-butyl acrylate discussion.

At this time, we are sharing this with you for awareness. We are going to share with CDC next to determine next steps.

Any questions or issues, please let us know!
Nate
