The International Drone Racing Association (IDRA), the Tesla Foundation, and their partners would like to invite you to a Congressional Briefing announcing the formation of UAS STEM Alliance (U-S-A), an effort to promote STEM (Science, Technology, Engineering, and Mathematics) programs and research and to inspire the next generation of technology leaders through drone technology and drone racing. Recognizing the critical role of STEM education and research in our country's life, its future economic growth, and our international competitiveness, U-S-A believes in promoting enthusiasm and knowledge of STEM through the excitement of drone technology and drone racing competition.
