EXECUTIVE SUMMARY

Many of the largest companies operating in the United States have fattened their profits by forcing employees to work off the clock or depriving them of required overtime pay. An extensive analysis of federal and state court records shows that these corporations have been embroiled in hundreds of lawsuits over what is known as wage theft and have paid out billions of dollars to resolve the cases. The list of the most penalized employers includes the giant retailer Walmart, as well as big banks, major telecommunications and technology companies, and a leading pharmaceutical producer. More than 450 large firms have each paid out \$1 million or more in wage theft settlements.

These findings result from a yearlong compilation of records of collective action lawsuits. In this little-studied form of labor standards enforcement, groups of workers take their employer to court to recover the pay they were wrongly denied.

We identified more than 1,200 successful collective actions involving large companies that have been resolved since the beginning of 2000. In these cases, employers paid total penalties of \$8.8 billion.

We also compiled actions against large employers pursued by the U.S. Department of Labor and by regulatory agencies in eight states which enforce wage theft and provided data (California, Illinois, Kentucky, Massachusetts, Minnesota, Missouri, Pennsylvania and Washington). Combining the lawsuits with the state and federal administrative actions, we found 4,220 cases against large employers that generated total penalties of \$9.2 billion.

Among the dozen most penalized corporations, Walmart, with \$1.4 billion in total settlements and fines, is the only retailer. Second is FedEx with \$502 million. Half of the top dozen are banks and insurance companies, including Bank of America (\$381 million); Wells Fargo (\$205 million); JPMorgan Chase (\$160 million); and State Farm Insurance (\$140 million). The top 25 also include prominent companies in sectors not typically associated with wage theft, including telecommunications (AT&T); information technology (Microsoft and Oracle); pharmaceuticals (Novartis); and investment services (Morgan Stanley and UBS).

Focusing on the very largest corporations in our dataset—just those listed on the Fortune 500, the Forbes list of the biggest privately held companies, and the foreign-based firms on the Fortune Global 500—we found 2,167 cases with total penalties of \$6.8 billion. These mega-corporations thus account for half of the cases we found and 74 percent of the penalty dollar total.

We found seven individual settlements in excess of \$100 million, including the \$640 million omnibus settlement by Walmart of more than 60 lawsuits and two FedEx settlements each in excess of \$200 million. Since collective actions are usually settled before trial, there are few verdicts. But Walmart leads in that category too, with a judgment of \$242 million. It has also paid the largest single administrative-case fine: \$33 million to the U.S. Labor Department.

There is considerable variety in the types of workers who brought the cases. The occupations represented in the largest settlements and verdicts range from low-wage jobs such as cashiers, cooks and security guards to higher-paid positions such as package delivery drivers, nurses, pharmaceutical sales representatives, stockbrokers and financial advisors.

Thanks to Walmart, retailing is the industry with the highest aggregate penalties (\$2.7 billion) imposed on large companies. It is followed by financial services (\$1.4 billion); freight and logistics (\$828 million); business services (\$611 million); insurance (\$557 million); miscellaneous services (\$486 million); healthcare services (\$417 million); restaurants and foodservice (\$397 million); information technology (\$335 million); and food and beverage products (\$315 million).

Of the ten most penalized industries named above, all but two—freight and information technology—employ large numbers of women, according to the Bureau of Labor Statistics. Several of these industries—especially business services, insurance and healthcare services—are predominantly female. In about half of these top ten industries, the percentage of Black and Latino workers is greater than in the workforce as a whole. For example, Black workers account

for about 12 percent of the overall workforce but 20 percent of the labor force in business support services and 17 percent in freight. Latino workers account for about 17 percent of the overall workforce but about 25 percent in restaurants and foodservice and 29 percent in food and beverage production.

Wage and hour litigation is not evenly distributed across the country. Of the 1,283 private lawsuits we analyzed, more than half came from a single state: California, which has its own labor code that can be enforced either in state court or in combination with federal rules in U.S. courts.

Although there are fluctuations from year to year, the lawsuit penalty total reached a high of \$1.3 billion in 2016. The tally in 2017 was \$732 million, the fourth-largest yearly total.

Our totals and rankings are based only on penalties that have been publicly disclosed. In numerous collective actions, large companies successfully petitioned federal or state courts to keep the details of the settlement confidential. We found records of 127 confidential cases involving 89 large companies. Among those that had multiple sealed settlements are AT&T, Home Depot, Verizon Communications, Comcast, Lowe's and Best Buy.

Given that lawsuits are typically brought against the immediate employer, our findings do not fully reflect the involvement in wage theft of large corporations that rely on temp agencies and employee leasing services. The findings also do not cover situations in which employees are compelled to resolve wage and hour disputes through arbitration proceedings, which are

conducted in secret and are therefore not included in court records.

The employers accused of wage theft include many highly profitable companies. As shown in the table below, among the dozen most penalized corporations, all but two had an annual profit of more than \$1 billion in its most recent fiscal year. Some had tens of billions in profits, including AT&T (\$29 billion), JPMorgan Chase (\$24 billion) and Wells Fargo (\$22 billion).

These companies also award their chief executives generous salaries, bonuses and perks. The table shows that four of the corporations (JPMorgan Chase, AT&T, Walmart and Bank of America) paid their CEOs annual compensation in excess of \$20 million. When the realized gains from stock options and other stock awards are added in, total compensation can reach much higher; JPMorgan Chase's Jamie Dimon took in more than \$162 million in 2017.

Clearly, these corporations could afford to pay their workers properly. Wage theft may have been part of their business model, but it does not need to be—and should not be.

This analysis underscores the importance of reforms to combat wage theft. Because wage theft is such a persistent problem in the U.S. economy, reforms must build working people's power, while also making targeted improvements to enforcement.

First, the fact that the amount of money recovered through private litigation dwarfs the amount recovered through administrative action demonstrates that government enforcement must be strengthened. Government agencies must have the resources to investigate pervasive

wage theft, and use their resources in ways that will most effectively combat the practice. Government regulators must also partner with organizations that represent and advocate for working people so that those most impacted by wage theft have a say and role in enforcement policies and oversight.

Second, states should follow California's lead by ensuring that working people have access to the courts to enforce wage and hour laws. Our analysis provides no indication that California companies are engaged in wage theft at a greater level than those in other states. Its large number of successful state lawsuits are a result of its stronger anti-wage theft laws. Given that the U.S. Supreme Court recently restricted one of the strongest private litigation tools to combat wage theft, states should also enact a version of California's Private Attorney General Act. This law allows working people to band together to sue low-road corporations through collective or class action suits.

Third, corporations that profit from wage theft should not be able to insulate themselves from liability through franchise models, misclassification of employees as independent contractors, outsourcing, or other methods. Policy makers must update wage theft laws to effectively regulate 21st-century business and employment models.

Fourth, labor law more generally must also be updated to give working people the power to fight exploitation by negotiating as equals with the companies and executives who profit most from their labor.

Profits and CEO Compensation for the Dozen Most Penalized Parent Companies

Parent	Profits	CEO annual compensation	CEO annual compensation plus realized gains from stock awards
Walmart	\$9.9 billion	\$22,352,143	\$37,460,812
FedEx	\$3.0 billion	\$15,605,597	\$28,603,991
Bank of America	\$18.2 billion	\$21,779,832	\$39,852,421
Wells Fargo	\$22.2 billion	\$17,564,014	\$22,723,169
JPMorgan Chase	\$24.4 billion	\$28,313,787	\$162,900,553
State Farm Insurance	\$2.2 billion	\$8,160,000	n.a.
AT&T	\$29.5 billion	\$28,720,720	\$41,920,869
United Parcel Service	\$4.9 billion	\$14,608,732	\$24,183,959
ABM Industries	\$3.8 million	\$4,686,371	\$5,596,827
Tenet Healthcare	-\$704 million	\$3,651,780	\$3,718,859
Zurich Insurance	\$3.0 billion	\$8,800,000	n.a.
Allstate	\$3.1 billion	\$17,069,187	\$67,788,618

Note: A list of parent companies with \$1 million or more in total penalties is included in Appendix A. Appendix B has a list of the 100 largest lawsuit settlements or verdicts. Appendix C has a list of lawsuits with confidential settlements. Details on the lawsuits can also be found, along with the federal and state administrative cases, in the Violation Tracker database at violationtracker.org.

The Varieties of Wage Theft

Off-the-clock work: Hourly workers may be required to perform certain tasks before they clock in or after they clock out and thus are not paid for those activities.
Overtime violations: Failure to pay non-exempt employees for time worked in excess of 40 hours per week.
Misclassification: The improper designation of certain workers as exempt from overtime pay (for example, by wrongly labeling them managers) or as independent contractors not subject to wage and hour requirements.
Minimum wage violations: Failure to pay workers the legally required federal or state rate. In some cases those rates may be a prevailing wage applicable to a government contractor or local living wage ordinance.
Meal or rest break violations: Failure to adhere to rules in some states requiring employers to provide breaks or compensate workers for that time.
Uncompensated clothing purchase requirements: Some apparel retailers require employees to purchase clothing sold at the store and wear it while working but fail to reimburse them for the expense.
Tip violations: Confiscating tips received by restaurant or hospitality workers or failing to pay tipped workers the difference between their tips and the required minimum wage. There are also controversies over pooling tips and sharing them with non-tipped employees and sometimes with management.
Other wage and hour violations: Issues that are often enforced by state agencies include late payment of wages or failure to pay at all.

INTRODUCTION: ANALYZING THE PREVALENCE OF WAGE THEFT IN BIG BUSINESS

On June 25, 1938, President Franklin D. Roosevelt signed into law the Fair Labor Standards Act (FLSA). The culmination of decades of struggle over excessive workweeks, inadequate pay levels and child labor, the FLSA put the federal government in the business of combatting the worst forms of workplace exploitation.

While the FLSA did not completely eliminate abusive practices, it limited their prevalence. For decades, minimum wage and overtime violations became much less common among larger companies even as they remained perennial problems at smaller fly-by-night firms, especially in labor-intensive industries such as garment production. These sweatshops were a central focus of the enforcement activity of the Wage and Hour Division (WHD) of the U.S. Labor Department.

Starting in the late 1970s, the U.S. labor market started to become more precarious as U.S. labor unions lost clout and employers responded to globalization, the financialization of the economy, Wall Street's emphasis on corporate earnings reports, and other competitive pressures. Large companies began to subcontract and outsource more of their work abroad and to smaller domestic operations with substandard working conditions.

By the 1990s the deterioration of employment was becoming more common at large companies themselves, and compliance with the FLSA

declined. In 1993, for example, the Food Lion supermarket chain had to pay \$16 million to settle WHD allegations that it denied thousands of workers required overtime compensation; it was also accused of child labor violations.¹ In a similar overtime case the following year, WHD ordered General Dynamics to pay \$5 million in back wages to more than 1,000 workers at its Electric Boat division.² In 1996, WHD fined meatpacker IBP Inc. \$7 million for overtime violations.³

There were limits, however, to what WHD could do. Some of the abuses involved ambiguous provisions of the FLSA, especially the issue of which employees were exempt from overtime pay requirements because they were deemed to be managers or professionals.⁴

By the late 1990s a growing number of employers in businesses such as retailing were doing an end run around the FLSA by giving workers titles such as assistant manager and declaring them exempt from overtime requirements, even though most of their time was spent on non-supervisory duties. Another

increasingly common practice was to require employees to perform tasks before they clocked in for their shifts or after they clocked out.

Faced with this onslaught against labor standards, some worker advocates decided they could no longer rely on WHD alone. They began enforcing the FLSA through collective action lawsuits, a variation of class actions authorized by the FLSA. In 1986 the United Food and Commercial Workers union brought a collective action lawsuit as part of an organizing drive at the Delta Pride catfish processing plant in Mississippi. Four years later, the UFCW sued the department store chain Nordstrom for requiring workers to perform personal services for customers while off the clock. The company later agreed to pay more than \$20 million to settle the case.⁵

What started as a trickle soon developed into a wave as class action plaintiffs' lawyers started filing one suit after another, especially in California.⁶ Walmart, known for its hardball labor practices, was sued repeatedly.⁷

For a time in the early 2000s, these lawsuits received a substantial amount of media attention, including several front-page stories in the *New York Times*.⁸ Eventually this coverage declined, yet the flow of litigation did not. The number of federal FLSA cases filed throughout the United States rose from fewer than 2,000 in 2001 to more than 7,000 a year a decade later, by which time the term “wage theft” was in common usage to describe the practice by employers of flouting the FLSA’s overtime and minimum wage provisions.⁹ Settlements with large companies piled up, including many in excess of \$1 million and some reaching tens of millions of dollars.

A main goal of the research behind this report is to reconstruct the history of those lawsuits and provide what we believe to be the first detailed public compilation of the cases. The project is part of the ongoing expansion of Violation Tracker, the database on corporate misconduct launched in 2015 by the Corporate Research Project of Good Jobs First.¹⁰

Until now, Violation Tracker has focused on enforcement actions brought by more than 40 federal regulatory agencies and all the divisions of the Justice Department. Using the research conducted for this report, the database is adding entries relating to private litigation and state enforcement, beginning with collective action lawsuits (both federal and state) dating back to 2000 as well as data on more than 12,000 enforcement actions by selected states. These cases complement the 34,000 federal WHD enforcement actions added to Violation Tracker in 2017.¹¹

This report looks at a subset of those cases involving larger companies. From the federal and state lawsuits and enforcement actions, we identified roughly 4,000 cases in which the employer is included in the universe of parent companies for which data is aggregated in Violation Tracker and its sister database Subsidy Tracker.¹²

Our purpose is to analyze the prevalence of wage theft in big business and to identify the specific corporations and industry sectors that have been involved most often and paid the largest penalty amounts.

THE BIG PICTURE

We identified more than 4,000 cases in which larger corporations—defined as those included in the universe of Violation Tracker/Subsidy Tracker parent companies—have paid a penalty for an alleged wage and hour violation in the period from January 2000 through the present. The 4,220 cases include 1,283 lawsuit settlements and verdicts totaling \$8.8 billion, as well as 2,937 administrative fines totaling \$440 million, giving a grand total of \$9.2 billion in penalties. More than 450 of the corporations have each paid out \$1 million or more in settlements or judgments.

Focusing on a group of the largest corporations—consisting of those listed on the Fortune 500, the Forbes list of the biggest privately held companies, and the non-U.S. firms on the Fortune Global 500—we found 2,167 cases with total penalties of \$6.8 billion. These mega-corporations thus account for more than half of the cases we found and 74 percent of the penalty dollar total. We found at least one wage theft case for 303 of the Fortune 500 companies.

Most Penalized Corporations

The employer that has paid far and away the most in wage theft penalties is Walmart, with more than \$1.4 billion in fines and settlements since 2000. The giant retailer's personnel practices prompted some of the first major wage and hour private lawsuits and brought the issue to the attention of the public. Back in 2002, the *New York Times* published a front-page story headlined "Suits Say Wal-Mart Forces Workers to Toil Off the Clock."¹³

Walmart initially fought the lawsuits but eventually relented. In December 2008 the company agreed to pay up to \$640 million in an omnibus settlement of more than 60 cases filed in courts around the country.¹⁴ This came after the company was fined \$33 million by the U.S. Labor Department.¹⁵

Despite these payouts, Walmart did not completely clean up its act. In 2016, for example, it had to pay \$242 million to settle a Pennsylvania case accusing it of preventing workers from taking meal and rest breaks.¹⁶

Although no other employer comes close to Walmart, others have racked up substantial penalties, and some of them are companies not commonly associated with wage theft. The second-highest penalty total—\$502 million—belongs to FedEx, which has settled more than a dozen private lawsuits accusing it of overtime and rest break violations, often combined with misclassification issues.

The next spots in Table 1 below, which shows the 25 most penalized firms, are taken by financial corporations, beginning with three giant bank holding companies: Bank of America (\$381 million in penalties), Wells Fargo (\$205 million) and JPMorgan Chase (\$160 million); Citigroup is 14th with \$110 million. Although these institutions are assumed to employ mostly high-paid analysts and traders, their payrolls also include many lower-wage back-office workers who have frequently accused the banks of cheating them out of overtime pay and rest

breaks. Higher paid bank workers have also brought suits. While Walmart is the only retailer among the dozen most penalized companies, banks and insurance companies account for six of those 12 spots.

Table 1 contains numerous other companies in businesses not typically associated with wage theft, including telecommunications (AT&T), information technology (Microsoft and Oracle), pharmaceuticals (Novartis) and investment services (Morgan Stanley and UBS).

TABLE 1. Parent Companies With Largest Cumulative Wage Theft Penalty Totals

Rank	Parent	Penalty total
1	Walmart	\$1,408,901,183
2	FedEx	\$502,165,827
3	Bank of America	\$381,499,089
4	Wells Fargo	\$205,403,723
5	JPMorgan Chase	\$160,459,643
6	State Farm Insurance	\$140,000,000
7	AT&T	\$139,390,011
8	United Parcel Service	\$138,077,624
9	ABM Industries	\$128,599,312
10	Tenet Healthcare	\$127,216,654
11	Zurich Insurance (Swiss parent of Farmers Insurance Exchange)	\$124,753,418
12	Allstate	\$122,000,000
13	Ecolab	\$111,288,882
14	Citigroup	\$110,005,835

Rank	Parent	Penalty total
15	Cerberus Capital Management (parent of Albertson's, Safeway and others)	\$103,494,221
16	Microsoft	\$102,855,841
17	Morgan Stanley	\$102,695,000
18	Novartis	\$99,199,443
19	UBS	\$97,239,652
20	Oracle	\$92,268,000
21	Sycamore Partners Management (parent of Staples and other retailers)	\$89,480,288
22	CVS Health	\$87,691,026
23	RadioShack (shell company following bankruptcy and extensive liquidation)	\$85,136,789
24	Rite Aid	\$78,007,420
25	Tyson Foods	\$75,119,297

Hidden Penalties

The rankings above may not be completely accurate, given that they are based only on penalties that have been publicly disclosed. In numerous cases, large companies have petitioned courts to keep the details of the settlement confidential. The terms of those agreements are reviewed by the presiding judge but are not made part of the public court docket.

Among the universe of large companies examined in this report, we found records of 127 confidential settlements involving 89 parents. Most of these (68) have one such settlement, but 12 have two, and nine showed up with three or more, as shown in Table 2.

Some of these nine companies, especially AT&T, are high in the rankings based on reported settlements and fines, but others are much farther down that list (see Appendix A), for example, Comcast at #110, McDonald's at #196 and Best Buy at #219. These companies might rank much higher on the penalty list if they had not been able to keep multiple wage theft settlements private.

Besides sealed settlements, the role of some parent companies in wage theft is not fully reflected in our data because of franchising, temp agencies and other forms of outsourcing. Unless the plaintiffs in a lawsuit were able to include the franchisor, the outsourcer or the client of the outside agency as a defendant and include them in the settlement or judgment, we were unable to attribute the penalties to the larger company that may be the ultimate employer.

Furthermore, companies are increasingly forcing employees to sign arbitration agreements as a condition of work. Such arbitration proceedings are conducted in secret and are therefore not included in court records. Arbitration may also occur if the court declines to grant class certification to the group of employees on whose behalf a lawsuit is filed.

TABLE 2. Parent Companies With Three or More Confidential Settlements Found

Parent	Number of confidential settlements found
AT&T	5
Home Depot	5
Verizon Communications	5
Comcast	4
Lowe's	4
Best Buy	3
IBM Corp.	3
McDonald's	3
Yum Brands	3

Repeat Offenders

Walmart is not the only employer to have been charged with wage theft and paid its penalties, only to be later sued or cited for continuing to engage in similar illegal labor practices. Among the universe of large companies we examined, nearly 600 paid a penalty in multiple cases.

In some instances the number of cases reached into the dozens. Hertz, which tops the list with an astounding 167 entries, surpasses Walmart's total of 98.¹⁷ All but one of the rental car company's entries are administrative matters, so its penalty total is just \$8.9 million, a tiny

fraction of the amount amassed by Walmart in numerous expensive lawsuit settlements.

The same is true for the security firm USProtect, which was fined 91 times by the federal Wage and Hour Division before it went out of business.¹⁸ Among the other leading repeat offenders shown in Table 3, the ones with the largest penalty totals boosted by lawsuit settlements are, aside from Walmart, Bank of America (\$381 million in combined penalties), AT&T (\$139 million) and the janitorial services company ABM Industries (\$128 million).

TABLE 3. Parent Companies With the Largest Number of Combined Fines and Settlements

Company	Number of Cases
Hertz	167
Walmart	98
USProtect Corp. (defunct)	91
Pilot Corp.	51
Daniyal Enterprises	51
CVS Health	44
ABM Industries	43
Cerberus Capital Management (parent of Albertson's, Safeway, etc.)	42
AT&T	34
Bank of America	34
Apollo Global Management (parent of ADT Corp. and other firms)	30
AECOM	26

Note: Includes confidential settlements for AT&T (5), Bank of America (1) and CVS (1).

Mega-Settlements

Companies such as Walmart and FedEx got to the top of the penalty rankings by entering into individual lawsuit settlements that sometimes reached nine-figure levels. As shown in Table 4, we found seven settlements in excess of \$100 million and 12 between \$50 million and \$99 million. Walmart accounts for five of these; FedEx has two. Twelve other parents have had a settlement of \$50 million or more.

There are 39 settlements between \$25 million and \$49 million, and 118 between \$10 million and \$24 million. Altogether, there are 176 settlements of \$10 million or more, with a combined dollar total of \$5.6 billion.

TABLE 4. Lawsuit Settlements of \$50 Million or More

Company	Amount	Year
Walmart (omnibus settlement)	\$640,000,000	2008
FedEx	\$226,500,000	2016
FedEx	\$204,000,000	2016
Walmart	\$152,000,000	2009
State Farm Insurance	\$135,000,000	2005
Allstate	\$120,000,000	2005
ABM Industries	\$110,000,000	2017
Novartis	\$99,000,000	2012
Citigroup	\$98,000,000	2008
Microsoft	\$97,000,000	2000
United Parcel Service	\$87,000,000	2007
Walmart	\$86,000,000	2010
Tenet Healthcare	\$85,000,000	2009
Walmart	\$85,000,000	2009
Bank of America	\$73,000,000	2013
IBM Corp.	\$65,000,000	2007
Walmart	\$54,000,000	2008
Cerberus Capital Management (Albertson's)	\$53,300,000	2007
Morgan Stanley	\$50,000,000	2009

Mega-Verdicts

The vast majority of successful private wage and hour lawsuits end in a settlement rather than a verdict, given that few of the cases go to trial. Of the 1,156 non-confidential cases we examine, only 20 (or 1.7 percent) ended in a verdict. Table 5 below shows the largest awards we found. The table does not include a \$97.3 million verdict against Wells Fargo handed down in May 2018 because it is being appealed by the bank.

TABLE 5. Ten Largest Wage and Hour Verdicts

Company	Amount	Year
Walmart	\$242,000,000	2016
Farmers Insurance Exchange (owned by Zurich Insurance)	\$90,009,208	2001
Walmart	\$60,800,000	2017
Family Dollar (now owned by Dollar Tree)	\$35,576,059	2009
Ecolab	\$27,400,000	2009
Tyson Foods	\$9,678,727	2006
Tyson Foods	\$5,785,757	2016
Panera (owned by JAB Holding Co.)	\$4,774,022	2016
Tyson Foods	\$4,420,271	2014
Gerber Products (owned by Nestle)	\$3,001,669	2016

Mega-Fines

The penalties imposed in administrative cases are typically much smaller than lawsuit settlement amounts, but multimillion-dollar fines are not unknown. The largest single administrative penalty we found is the \$33 million fine against Walmart mentioned earlier. The case involved overtime pay for more than 86,000 workers over a period of five years.

The second-largest penalty, also imposed by the Wage and Hour Division, is the \$21 million fine against private prison operator Management & Training Corporation in 2009.¹⁹ The largest state penalty we found in our limited sample of such data is the \$8 million fine imposed in 2013 by the California Labor Commissioner against Hensel Phelps Construction Company for prevailing wage violations.²⁰ Table 6 lists 11 fines of \$5 million or more.

TABLE 6. Administrative Fines Above \$5 Million

Company	Amount	Agency	Year
Walmart	\$33,000,000	U.S. DOL Wage and Hour Division	2007
Management & Training Corp.	\$20,998,873	U.S. DOL Wage and Hour Division	2009
Halliburton	\$18,293,557	U.S. DOL Wage and Hour Division	2015
Perdue Farms	\$10,000,000	U.S. DOL Wage and Hour Division	2002
Hensel Phelps	\$8,072,273	California Labor Commissioner's Office	2013
CoreCivic (CCA of Tennessee, LLC)	\$8,071,861	U.S. DOL Wage and Hour Division	2013
Chickie's & Pete's Inc.	\$6,892,412	U.S. DOL Wage and Hour Division	2014
Microsoft (LinkedIn Corp.)	\$5,855,841	U.S. DOL Wage and Hour Division	2014
Wells Fargo (Wachovia)	\$5,798,744	U.S. DOL Wage and Hour Division	2004
DXC Technology (Electronic Data Systems)	\$5,365,982	U.S. DOL Wage and Hour Division	2007
Walmart	\$5,058,550	U.S. DOL Wage and Hour Division	2007

Occupational Diversity

There is considerable variety in the types of workers who brought the wage theft lawsuits. The occupations range from low-wage jobs such as cashiers, cooks and security guards to higher-paid positions such as package delivery drivers, nurses, pharmaceutical sales representatives, stockbrokers, and financial advisors.

While it was not always possible to identify the occupation of the plaintiffs, especially in older cases for which complete court records were not readily available, we looked at the types of plaintiffs involved in the 25 largest settlements and verdicts. Eight of those cases (seven of which were brought against Walmart and the other against Albertson's) involved a variety of retail positions. Four cases (two against UBS and one each against Citigroup and Morgan Stanley) involved financial advisors or stock brokers. Three cases (two against FedEx and one against United Parcel Service) involved package delivery drivers. Three cases (against State Farm, Allstate and Farmers Insurance) involved claims adjusters. Two cases involved various tech jobs (IBM and Microsoft). There was one case each involving security guards (ABM Industries), bank tellers (Bank of America), various restaurant jobs (Brinker International), pharmaceutical sales representatives (Novartis), and nurses and other hospital employees (Tenet Healthcare).

Most Penalized Industries

Given the track record of Walmart, it is no surprise that retail turns out to be by far the industry with the largest aggregate penalty total, \$2.7 billion, for the universe of companies we examined. Even without Walmart, retailing accounts for \$1.3 billion.

Ranked second is an industry that one might not have expected to appear so high: financial services, with aggregate penalties of \$1.36 billion.

As shown in Table 7, no other industry group has a penalty total above \$1 billion. The one that comes closest is freight and logistics, followed by business services. Retail also leads in the number of cases with 608; second is business services with 495 followed by miscellaneous services with 473. Behind those are healthcare services, restaurants/foodservice and financial services.

Among the 50 most penalized parent companies, only three are from the goods-producing sector: Novartis, which ranks 18th with \$99 million in penalties, Tyson Foods (25th with \$75 million) and Coca-Cola (43rd with \$38 million).

TABLE 7. Industry Sectors With Penalty Totals of \$50 Million or More; Most Penalized Parent in Each

	Industry sector	Penalty total	Cases	Parent with most penalties
1	Retail	\$2,711,180,158	608	Walmart: \$1,408,901,183
2	Financial services	\$1,363,923,660	237	Bank of America: \$381,499,089
3	Freight and logistics	\$828,213,965	145	FedEx: \$502,165,827
4	Business services	\$611,498,890	495	ABM Industries: \$128,599,312
5	Insurance	\$557,239,251	85	State Farm Insurance: \$140,000,000
6	Miscellaneous services	\$486,239,946	473	24 Hour Fitness: \$55,448,500
7	Healthcare services	\$416,500,210	265	Tenet Healthcare: \$127,216,654
8	Restaurants and foodservice	\$396,616,532	238	Yum Brands: \$53,275,595
9	Information technology	\$335,548,366	101	Microsoft: \$102,855,841
10	Food and beverage products	\$315,147,724	147	Tyson Foods: \$75,119,297
11	Telecommunications	\$257,993,904	108	AT&T: \$139,390,011
12	Healthcare products	\$137,201,534	28	Novartis: \$99,199,443
13	Miscellaneous manufacturing	\$96,867,284	158	NCR Corp.: \$11,107,966
14	Entertainment	\$93,889,030	77	Electronic Arts: \$31,285,000
15	Wholesalers	\$84,601,927	58	Sysco: \$22,602,956
16	Oil and gas	\$59,423,191	50	ConocoPhillips: \$15,500,000
17	Construction and engineering	\$58,927,883	129	MasTec: \$13,194,901
18	Oilfield services	\$51,745,062	48	Halliburton: \$18,450,073

Disproportionate Impact

Wage theft affects a wide range of workers, and neither the lawsuit data nor the government data breaks down wage theft victims by race, ethnicity, or gender, but the data on the industries sectors in Table 7 above suggests that women and people of color may be disproportionately the victims of wage theft.

Of the ten most penalized industries shown above, all but two—freight and information technology—employ large numbers of women, according to the Bureau of Labor Statistics.²¹ Several—especially business services, insurance and healthcare services—are predominantly female.

Workers of color do not constitute anything close to a majority of the labor force in any of the most penalized industries. Yet in about half of the top ten sectors, the percentage of Black and Latino workers is greater than the presence of those groups in the workforce as a whole. For example, black workers account for about 12 percent of the overall workforce but 20 percent of the labor force in business support services and 17 percent in freight. Latino workers account for about 17 percent of the overall workforce but about 25 percent in restaurants and foodservice and 29 percent in food production.²²

Offense Types

Wage theft has numerous aspects: failure to pay overtime, off-the-clock work, misclassification, prevailing wage violations, etc. For each of the private litigation settlements and verdicts we found, we assigned one of nine categories, based on what issue was mentioned most prominently in the source materials we used. We were unable to do this with the administrative cases because the available data often did not contain enough detail.

As Table 8 shows, overtime is the most common issue, followed by misclassification and meal/rest break violations. Many cases, however, involve a combination of issues. For example, misclassified workers usually end up performing unpaid overtime and may put in enough total hours so that they are receiving less than the legal hourly minimum wage.

“Donning and doffing” cases involve disputes over whether workers should be paid for the time required to put on and take off protective gear. Clothing purchase disputes are situations in which workers challenge the refusal of retailers to reimburse them for apparel they are required to buy from the store and wear while on the job.

Given the recent attempt by the federal government and restaurant industry to allow restaurant owners and managers to take employee tips for themselves, it is worth noting that we found 15 lawsuits on this issue. The largest settlements include Starbucks (\$23.5 million), TGI Friday’s (\$19.1 million), and Morton’s Restaurant Group (\$12 million).

Table 8. Breakdown of Settlements and Verdicts by Main Offense Cited

Main offense cited	Number
Overtime violation	497
Misclassification	172
Meal/rest break violation	159
Other pay violation	151
Off-the-clock work	97
Donning and doffing	33
Minimum wage violation	25
Tip dispute	15
Clothing purchase dispute	5

Geography of Wage Theft Litigation

Wage and hour lawsuits are not evenly distributed across the country. Of the 1,283 cases we analyze, more than half come from a single state: California. The reason is that California has stronger labor standards that can be enforced either in state court or in federal court in cases that concern both these standards and the federal wage and hour regulations. As Table 9 below shows, New York ranks second and no other state comes close after that.

California is even more dominant when looking at state lawsuits alone. Of the 252 we found, California accounts for 233, or more than 90 percent of the cases. The other states where we found such cases are: Pennsylvania (5 cases), Massachusetts (2), Oregon (2), Washington (2), and one each in Arkansas, Colorado, Minnesota, Missouri, New York, Wisconsin and West Virginia.

Within California, the state litigation is highly concentrated in Superior Court in Los Angeles County, which accounts for 116 of the 233

cases. Next is Orange County with 29, Alameda and San Francisco counties with 17 each, San Diego with 13, and Santa Clara with 12.

California’s federal cases are also concentrated. Of the 443 cases, 185 come from the Northern District (Bay Area), 171 from the Central District (Los Angeles area), 49 from the Southern District (San Diego) and 38 from the Eastern District (Sacramento, Fresno, etc.). One is from multiple districts.

For the country as a whole, we found cases in 77 of the 94 federal court districts, but only 22 of those have had ten or more cases. These districts, which include many of the country’s largest metropolitan areas, are shown in Table 10.

Table 9. States With the Most Wage and Hour Private Lawsuits

State	Federal cases	State cases	Total cases
California	443	233	676
New York	131	1	132
Illinois	56	0	56
Pennsylvania	39	5	44
Florida	34	0	34
New Jersey	27	0	27
Massachusetts	24	2	26
Texas	26	0	26
Ohio	21	0	21

Southern District of Ohio	11
Northern District of Ohio	10
Western District of Washington	10

Penalty Trends Over Time

The annual penalty totals among the lawsuits we examined do not follow a continuous trend, but they indicate that wage and hour litigation is still going strong nearly 20 years since it first became a frequent legal tool in the early 2000s. As Table 11 below shows, the single highest penalty total

was \$1.3 billion in 2016, and the 2017 total of \$732 million was the fourth highest.

There has also been fluctuation in the size of the largest penalty from year to year. While no year has had a top case close to Walmart's 2008 omnibus \$640 million settlement, the all-time second-place penalty of \$242 million, also involving a Walmart settlement, came in 2016.

Table 11. Annual Lawsuit Penalty Totals and Each Year's Largest Case

Year	Total penalties	Largest case	Defendant company
2000	\$100,000,000	\$97,000,000	Microsoft
2001	\$253,809,208	\$90,009,208	Zurich Insurance (Farmers Insurance Exchange)
2002	\$117,550,000	\$29,900,000	RadioShack
2003	\$30,400,000	\$14,200,000	Royal Caribbean Cruises
2004	\$111,158,320	\$19,500,000	Automobile Club of Southern California
2005	\$427,496,750	\$135,000,000	State Farm
2006	\$372,767,083	\$42,500,000	Morgan Stanley
2007	\$460,562,180	\$87,000,000	United Parcel Service
2008	\$1,085,019,585	\$640,000,000	Walmart
2009	\$883,493,304	\$152,000,000	Walmart
2010	\$458,494,623	\$86,000,000	Walmart
2011	\$400,014,239	\$42,000,000	JPMorgan Chase and Staples (two separate cases with same amount)
2012	\$439,366,135	\$99,000,000	Novartis
2013	\$568,448,166	\$73,000,000	Bank of America
2014	\$422,372,915	\$44,300,000	Brinker International
2015	\$406,319,647	\$42,000,000	Tenet Healthcare
2016	\$1,330,762,178	\$242,000,000	Walmart
2017	\$732,469,487	\$110,000,000	ABM Industries

CONCLUSION: WAGE THEFT SHOULD NOT BE A BUSINESS MODEL

The findings above suggest that big business remains heavily involved in wage theft and that plaintiffs’ lawyers continue to extract substantial sums in back pay and other compensation for victims of abusive labor practices.

Less clear is whether these escalating penalties are deterring employers from continuing to engage in wage theft. Penalty amounts may have to be increased and combined with other forms of punishment to fully restore economic justice to the workplace.²³

The employers accused of wage theft include many highly profitable companies. As shown in Table 12 below, among the dozen most penalized corporations, all but two had an annual profit of more than \$1 billion in its most recent fiscal year. Some had bottom lines well above that figure, including AT&T (\$29 billion), JPMorgan Chase (\$24 billion) and Wells Fargo (\$22 billion).

They are also companies that pay their chief executives generous salaries, bonuses and perks. The table shows that CEOs at four of the corporations (JPMorgan Chase, AT&T, Walmart and Bank of America) got annual compensation in excess of \$20 million. When the realized gains from stock options and other stock awards are added in, total compensation can soar much higher; JPMorgan Chase’s Jamie Dimon took in more than \$162 million in 2017.

Clearly, these corporations could afford to pay their workers properly. Wage theft may have been part of their business model, but it does not need to be—and should not be.

Table 12. Profits and CEO Compensation for the Dozen Most Penalized Parent Companies

Parent	Profits	CEO annual compensation	CEO annual compensation plus realized gains from stock awards
Walmart	\$9.9 billion	\$22,352,143	\$37,460,812
FedEx	\$3.0 billion	\$15,605,597	\$28,603,991
Bank of America	\$18.2 billion	\$21,779,832	\$39,852,421
Wells Fargo	\$22.2 billion	\$17,564,014	\$22,723,169
JPMorgan Chase	\$24.4 billion	\$28,313,787	\$162,900,553
State Farm Insurance	\$2.2 billion	\$8,160,000	n.a.
AT&T	\$29.5 billion	\$28,720,720	\$41,920,869
United Parcel Service	\$4.9 billion	\$14,608,732	\$24,183,959
ABM Industries	\$3.8 million	\$4,686,371	\$5,596,827
Tenet Healthcare	-\$704 million	\$3,651,780	\$3,718,859
Zurich Insurance	\$3.0 billion	\$8,800,000	n.a.
Allstate	\$3.1 billion	\$17,069,187	\$67,788,618

POLICY RECOMMENDATIONS TO COMBAT RAMPANT WAGE THEFT

by Adam Shah
Jobs With Justice Education Fund

As this report shows, many of the largest U.S. companies routinely engage in wage theft. These corporations apparently consider private litigation and government enforcement of wage and hour laws a cost of doing business rather than a real threat to their bottom lines or their reputations. Furthermore, because government penalties are orders of magnitude smaller than the sums recovered through private collective actions, the U.S. Supreme Court's recent decision to allow corporations to force their employees to sign away their right to engage in such collective actions will make it even harder to fight wage theft.

Working people and their advocates must press for policy changes to address these problems and must build collective power for working people to ensure companies do not come up with new ways to exploit their employees. First, federal and state regulators should increase appropriations for wage and hour enforcement. Regulators should also use strategic enforcement and other methods to maximize impact on labor law violators in a way that builds working people's collective power, shifting workplace dynamics so fewer bosses have the ability to underpay. Second, states and localities should use California's anti-wage-theft laws as a guide to reform their own laws and to deal with the Supreme Court's recent decision to give corporations the power to ban private collective wage theft actions. Third, federal and state law

must be updated for the modern workplace to ensure corporations that benefit most from wage theft are subject to penalties when caught. Fourth, working people must have the right to challenge the ultimate beneficiaries of the wage theft such as franchisors or outsourcers, not just their immediate employers. Working people organizing formally as labor unions or through more informal methods may be the best means of stopping wage theft.

Government enforcement must be strengthened at both the federal and state level.

Government enforcement is a necessary tool for fighting wage theft. The fact that working people have had to rely so heavily on private litigation to recoup lost wages shows that government regulations need strengthening.

Using private litigation to recover stolen pay will always pose barriers for working people. It is often difficult to find an attorney.²⁴ Private litigation can be lengthy, expensive, and time-consuming. Even for wage theft victims who have the time and means, private litigation is not always an option. Many individuals have been forced to sign away their ability to pursue court cases because their employers required them to sign forced arbitration clauses as a condition of being hired.²⁵

As a result, the government's own enforcement of its minimum wage and overtime laws has always been a crucially important part of stopping the exploitation of working people. Indeed, shortly after passing of the first federal minimum wage and overtime law, the federal Department of Labor's Wage and Hour Division (WHD) was created to enforce the law.²⁶ However, an investigation by *Politico* found that "workers are so lightly protected that six states have no investigators to handle minimum-wage violations, while 26 additional states have fewer than 10 investigators."²⁷ *Politico* also found that the number of federal Department of Labor wage theft investigators had shrunk by more than ten percent since 1948 even though the population of U.S. workers has grown seven-fold over the same time period.

There are several policy proposals that can strengthen government wage-theft investigation:

- *States and the federal government should greatly increase their enforcement budgets to hire more investigators.* This recommendation is the clearest and most obvious way to ensure stronger government enforcement.
- *Government agencies should be strategic in their inquiries into possible wage and hour violations.* David Weil, who served as administrator of the WHD during the latter part of the Obama administration, laid out key factors that enforcement agencies need to take into account in deciding whom to investigate. Using Violation Tracker and other data, enforcement agencies can identify and prioritize the industries and geographic areas where wage theft appears most often, and can determine the key companies responsible. These agencies can should take steps to make

sure their limited resources are used to punish the worst offenders and deter others from offending.²⁸

- *Government agencies should use co-enforcement strategies to target their enforcement activities by partnering with organizations with industry expertise and relationships with working people.* A groundbreaking report by Rutgers Professor Janice Fine explained that government will never be able to fully enforce anti-wage theft laws unless it partners with unions and other organizations of working people.²⁹ Unions, worker centers, and other worker organizations can reach vulnerable workers who do not know how to reach out to the government or are afraid to do so. These organizations can also help identify low-road employers through their membership and organizing efforts and can engage in more aggressive publicity campaigns against wage theft than a government agency typically can. Furthermore, co-enforcement can lead to a virtuous circle in which organizations that represent and advocate for working people gain strength through co-enforcement of wage theft laws, allowing working people to achieve more power directly for themselves, which will end up decreasing wage and hour violations in industries that have become organized and allowing government enforcement resources to shift to other industries for enforcement that are not as organized.

States should use California as a model to strengthen their own wage and hour laws.

As the body of the report states, California cases dominate the field of private wage and hour litigation, accounting for 90 percent of state court cases and more than half of federal and state court cases combined. There is no indication that litigation occurs so often in California because that state's corporations are particularly likely to engage in wage theft. Rather, California has strengthened its anti-wage theft laws in a manner that all states and, where applicable, localities should do.

California also has a unique statute that allows working people to have their day in court even when companies try to ban wage-theft collective actions through forced arbitration clauses. The large settlements and judgments described in the body of this report were not the result of one plaintiff taking a company to court over a wage theft violation. These payouts came as the result of collective actions under the Fair Labor Standards Act³⁰ or similar class actions under state law. Corporations have sought to close off this route by forcing employees to sign forced arbitration clauses banning class action lawsuits. The National Labor Relations Board has held that required signing of such clauses violates employees' rights to act collectively,³¹ but the U.S. Supreme Court recently overruled that decision and allowed corporations to scuttle wage theft collective actions.³²

- *States should follow California's lead on access to courts.* California allows working people to enforce each aspect of its wage and hour law directly by going to court rather than by asking government to enforce the laws on

their behalf. Most of the California counties and municipalities that have enacted wage and hour laws have done likewise.³³ In most cases, California law also requires companies found to have violated wage theft laws to pay the plaintiffs' attorneys fees.³⁴ Furthermore, California allows working people to band together in class actions to sue corporations that engage in wage theft. While many states and localities have some of these types of protections on the books, few have all of these protections. For instance, a 2006 American Bar Association study found that only 17 states unambiguously allow working people to band together to pursue wage theft class actions.³⁵

- *States should follow California's lead on strong protections for working people beyond federal standards.* California has also adopted wage and hour rules that go well beyond federal standards, including an increased minimum wage,³⁶ additional overtime rules,³⁷ and meal and rest break requirements.³⁸
- *States should adopt California's Private Attorney General Act.* Although the Supreme Court recently allowed corporations to force their employees to sign away the right to file wage theft collective actions, California has a statute that still allows wage theft victims to have their day in court: the California Private Attorney General Act (PAGA). This statute gives victims an additional avenue to bring enforcement actions against wage and hour law violators. Rather than bringing a collective action, they can bring enforcement actions to subject their employers to the same civil penalties that the California attorney general could seek if she or he brought the case instead. In other words, rather than

sue in their own names for their own back wages and other damages, victims can sue the company in the name of the state to collect penalties. The California courts have already held that the right to file PAGA lawsuits cannot be signed away through a forced arbitration clause.³⁹ This remedy is not a panacea, however, since 75 percent of the award under PAGA goes to the state and only 25 percent to the victims. But other states can adjust that provision when adopting similar laws. Given the Supreme Court's decision, this regulation is one of the few ways to enforce wage theft violations through private litigation.

Federal and state laws must be clarified to ensure that working people can hold the ultimate profiteers from wage theft responsible.

The body of the report shows that large corporations in a wide variety of industries are engaged in wage theft. However, one important industry appears to be severely underrepresented: the restaurant industry. According to studies, nine out of ten people working in fast food have experienced wage theft.⁴⁰ Yet high-profile companies such as McDonald's are not among the top violators according to the data. This mismatch is likely due to the fact that McDonald's, like many other large restaurant chains and retailers, operates on a franchise model, in which McDonald's Corporation does not sign the paychecks of the vast majority of the people who work at McDonald's restaurants. Rather, individual franchisees sign the checks.

In addition, FLSA and state laws contain many inexcusable exemptions from coverage, many which are due to compromises made in the 1930s to gain the votes of racist members of Congress.⁴¹ As a result, several industries that have traditionally been staffed by people of color are exempt from some or all wage and hour protections, including farmworkers, people in the eldercare industry, and live-in domestic employees.⁴²

The Obama administration tried to deal with many of the ways corporations make an end run around FLSA compliance. The Trump administration is seeking to undo much of the progress. For instance, the WHD under President Obama pointed out that the FLSA definition of "employer" was very broad and likely covered many of the types of arrangements, such as franchising, outsourcing, and subcontracting that corporations now use to put distance between themselves and the people from whose labor they profit.⁴³ However, the Trump administration has rescinded both of these interpretations.⁴⁴ Thus, the Trump administration has signaled that it will not try to rein in rampant wage theft in restaurant, retail, and other industries, but will continue to pretend that large corporations benefiting from wage theft have no duty to repay.

There are straightforward fixes for many of these issues, however.

- *States and the federal government should amend their anti-wage-theft laws to reflect the 21st-century workplace.* The FLSA was written before franchise models, subcontracting, outsourcing and other techniques to lessen tax and employee liability became popular in the corporate world. The language of wage and

hour laws must be updated to make crystal clear that the entity ultimately profiting from wage theft is liable.

- *Statutes and regulations must be updated to counteract rampant misclassification of employees as FLSA-exempt.* The exemption to wage and hour laws most used by corporations is the exemption for executive, administrative, and professional personnel. Today, many companies classify low-level employees as managers to force them to work overtime hours for free. The Obama administration tried to deal with this issue by increasing the salary threshold below which all employees are covered by overtime and minimum wage protections. This would have extended overtime protections to 4 million working people now largely misclassified as managers. Unfortunately, a federal judge struck down that move, and the Trump administration has taken actions to undo the regulations. Therefore, there is a necessity for new regulations and a strong legal defense of those regulations in court as well as stronger statutory language to prevent misclassification.
- *States and the federal government must end racist exemptions.* Working people in industries such as eldercare and agriculture should not be subject to sub-minimum-wage work or to brutal workweeks. This legacy of slavery and Jim Crow should be erased from federal labor laws.

Collective bargaining and collective worker power are the most effective way to stop wage theft.

As Professor Fine has pointed out, “Multiple studies have shown that the presence of unions, worker centers, and empowered workers at the worksite improves enforcement.”⁴⁵ Government enforcement is subject to regulatory capture, hostile administrations and legislatures, and scarce resources. Private litigation is expensive and time-consuming, and judges and courts are subject to forces similar to regulatory capture, especially given big business’s current intense focus on the courts.⁴⁶

And Fine’s insight is borne out by the private litigation data. After all, it was a union of working people, the UFCW, that pioneered the use of collective action litigation in the 1980s and 1990s. The employment law bar has followed UFCW’s lead and filed more private wage theft litigation, but unions remain involved in the issue. The Communications Workers of America most recently filed a complaint with the federal Department of Labor calling for an investigation of General Dynamics Information Technology call centers.⁴⁷

Working people cannot wait for government to be on their side. Instead, they must assert their power in numbers, through a union or other organization that advocates on behalf of working people, to call offending corporations to account. Strengthening and modernizing laws governing unionization and collective action are important in the fight against wage theft. Worker advocates must also focus on building working people’s power.

- *Wage theft law reforms must include mechanisms to build power for working people.* Fixing wage and hour laws will help fight wage theft in the short run. However, corporations and their legal advisors will think up ways to get around the fixes soon enough. Therefore, a more strategic approach that builds power for working people is necessary. For instance, rather than simply calling for more resources for government regulators, it is important to ensure that some of the enforcement resources go toward a co-enforcement strategy in which government regulators work alongside organizations represent working people and mutually build each other up. Rather than simply clarifying the FLSA definition of “employer,” it is necessary to design a standard that gives working people the power to negotiate directly with corporate executives.
- *Re-imagine labor law to combat wage theft.* The traditional National Labor Relations Act model that worked so well to build power for working people and lift up living conditions is not working in the 21st century. Ten percent of working people belong to a union.⁴⁸ While some working people are also affiliated with non-union worker advocates, such as worker centers, on the whole, very few working people in the United States have the collective power to stand up to greedy corporations engaged in wage theft. Given the steady attacks on working people’s ability to join together for a better life, and the resulting decline of working people in unions, it is unlikely that small fixes will build the collective power of working people. Instead, there needs to be large-scale reform for the current century.

METHODOLOGY

Setting out to compile a list of successful wage and hour lawsuits, we were confronted with the fact that, according to statistics from the Administrative Office of the U.S. Courts, approximately 100,000 federal lawsuits have been filed under the Fair Labor Standards Act since 2000.⁴⁹ Filings in state courts made the number even higher. It was simply not practical to check the dockets of all those cases.

We used two alternative approaches. First, we looked for sources that reported on significant settlements and verdicts. A big boost to our effort came in the list of private wage and hour lawsuits contained in Appendix B of Kim Bobo's 2009 book *Wage Theft in America*.⁵⁰ Also helpful were the Seyfarth Shaw annual surveys of employment litigation, which include lists of the ten largest wage and hour settlements of the year.⁵¹ We also did extensive searching in news archives, academic journals, law review articles, and reports from public policy organizations for references to cases. We also consulted web resources such as Law360.com, Lawyersandsettlements.com and the websites of plaintiffs' law firms.

From these sources we assembled a spreadsheet of more than 1,500 case leads. For those that involved larger companies (about two-thirds of the total) we confirmed outcomes and collected details by using the PACER database, which brings together dockets from all federal courts, and the subscription service Courtlink, which provides the best access to state court dockets.⁵² The larger companies are ones that are included in the Violation Tracker/Subsidy Tracker universe of parent corporations.⁵³

Our second approach was to search for additional settlements and verdicts involving roughly 1,000 of the largest companies doing business in the United States, deriving the list from the Fortune 500, the Forbes list of the largest privately held firms, and the non-U.S.-based companies in the Fortune Global 500. We did this by running the names of the companies and their main subsidiaries through the online archives of two specialized publications—*Mealey's Litigation Report: Employment Law* and the *Class Action Reporter*—as well as Bloomberg Law's FLSA Litigation Tracker, which collects PACER docket information on cases filed in recent years.

For each case we collected data such as case name, court, case number, nature of the case, resolution date, settlement or verdict amount and online source (for federal cases we also captured a link to the PACER docket). In addition, we collected a copy of the key court document listing the penalty amount and often other key details about each case. These documents had various names, including Settlement Agreement, Memorandum of Points and Authorities, Stipulation, Motion for Approval, etc. In some cases the penalty amount appears in a motion for preliminary approval but not the motion for final approval.

Settlement amounts include legal fees, which are not always clearly separated out in court documents. For settlements in which the penalty was expressed as a range, we used the maximum amount. For cases with confidential settlements we collected all the data listed above except for the penalty amount. We excluded cases that were settlements with individual plaintiffs rather than collective actions. We included some recent settlements that have received preliminary court approval but not yet received final approval. Dates reflect when the settlement was approved or when a verdict was announced.

Once we had our list of cases, we added the name of the parent company of the employer, an industry designation and an indication of whether the parent is part of lists such as the Fortune 500.

We obtained most of the federal administrative cases from the Wage and Hour Division dataset downloadable at https://enforcedata.dol.gov/views/data_summary.php. That dataset does not include dates on which fines were imposed or cases were closed, so we used the Findings End Date provided. This dataset is supplemented by enforcement actions reported in press releases posted at <https://www.dol.gov/newsroom/releases/agency/whd>. We excluded cases with fines below \$5,000.

State administrative cases were obtained from several online sources as well as open records requests submitted to those states that appear to be most active in wage and hour enforcement. The online sources included a downloadable list of cases handled by the Massachusetts Attorney General's Fair Labor Division⁵⁴ as well as individual case press releases posted by the California Labor Commissioner⁵⁵ and the New York Attorney General's Office.⁵⁶

We filed open records requests with 20 states, asking each for a list of cases in electronic spreadsheet form. A number of states denied the request, saying we were in effect asking them to create a new record, which they are not required to do. Ten states provided data. The data for three of those states (Hawaii, Indiana and Oregon), showed fines that were nearly all below our \$5,000 threshold, so we excluded them. The states whose open records data we used (in addition to the posted Massachusetts data) are California, Illinois, Kentucky, Minnesota, Missouri, Pennsylvania and Washington. Although all the cases from these states with penalties of at least \$5,000 are being added to Violation Tracker, only those linked to a Tracker parent company are included in the dataset analyzed for this report.

The research for this report was completed on May 1, 2018.

APPENDICES

Appendix A: Parent companies with \$1 million or more in wage theft penalties

Rank	Parent Company	Total Penalties	Number of Cases
1	Walmart	\$1,408,901,183	36
2	FedEx	\$502,165,827	15
3	Bank of America	\$381,499,089	34
4	Wells Fargo	\$205,403,723	24
5	JPMorgan Chase	\$160,459,643	22
6	State Farm Insurance	\$140,000,000	2
7	AT&T	\$139,390,011	34
8	United Parcel Service	\$138,077,624	8
9	ABM Industries	\$128,599,312	43
10	Tenet Healthcare	\$127,216,654	3
11	Zurich Insurance	\$124,753,418	10
12	Allstate	\$122,000,000	2
13	Ecolab	\$111,288,882	8
14	Citigroup	\$110,005,835	8
15	Cerberus Capital Management	\$103,494,221	42
16	Microsoft	\$102,855,841	2
17	Morgan Stanley	\$102,695,000	4
18	Novartis	\$99,199,443	2
19	UBS	\$97,239,652	6
20	Oracle	\$92,268,000	10

- 22 Ibid.
- 23 Currently, the FLSA allows plaintiffs to receive twice the amount of wages that were stolen from them as well as reasonable attorney’s fees, but it generally does not allow them to recover damages for pain and suffering or punitive damages, even if the plaintiffs can prove the wage theft was intentional. See 29 U.S.C. § 216.
- 24 The organization Workplace Fairness explains that “most attorneys cannot take a contingent fee case unless the merits and client are very strong and the damages are significant.” See Workplace Fairness, Do I Need a Lawyer, available at <https://www.workplacefairness.org/needlawyer> (last visited May 9, 2018).
- 25 See Matthew Finkin, Dealing with harassment? Discrimination? Wage theft? Good luck getting justice with mandatory arbitration, *Los Angeles Times*, February 9, 2018.
