The eligibility age will be reduced below 60 years of age by 3 months for each aggregate of 90 days on which such person serves on such Active Duty or performs such Active service in any fiscal year after January 28, 2008, or in any two consecutive fiscal years after September 30, 2014.

Section 701—Contraception Coverage Parity under the TRICARE Program

This section would amend section 1074d of title 10, United States Code, to allow members and former members of the uniformed services access to care related to the prevention of pregnancy with no cost sharing.

TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

LEGISLATIVE PROVISIONS

SUBTITLE A—ACQUISITION POLICY AND MANAGEMENT

Section 801—Establishment of Acquisition Pathways for Software Applications and Software Upgrades

This section would direct the Secretary of Defense to establish a new software acquisition pathway to procure, develop, deploy, and continuously improve software for applications in the Department of Defense. It would utilize innovation ecosystems already in existence inside the Department. This section would require a report on the implementation not later than 180 days after the date of the enactment of this Act.

The committee notes that the security of the United States increasingly relies on software to execute missions, integrate and collaborate with allies, and manage the defense enterprise. The ability to develop, procure, assure, deploy, and continuously improve software is thus central to national defense. Software should

enable a more effective joint force, strengthen our ability to work with allies, and improve the business processes of the Department enterprise.

Section 802—Software Development and Software Acquisition Training and Management Programs

This section would direct the Secretary of Defense to implement software development and acquisition training and management programs for all software acquisition professionals, developers, and associated functions to provide software practitioners access to modern engagement and collaboration platforms to connect, share their skills and knowledge, and develop solutions leveraging the full defense enterprise.

The committee recognizes that the Department of Defense requires a workforce capable of acquiring, building, and delivering software and technology in real time. As threats and demands emerge, providing a strong training and management program ensures the Department has talented and skilled leaders at the helm. The committee is aware there is no comprehensive training or development program that prepares the software acquisition and technical workforce managers to adequately support and lead teams to deploy modern development tools and methodologies for continuous capability development and deployment within the Department's dynamic environments. The committee encourages the Secretary of Defense to partner with institutions of higher education or private sector organizations, to the extent practicable, to incorporate existing training and management programs that are helpful in the software realm.

Section 803—Supply Chain Security of Certain Telecommunications and Video Surveillance Services or Equipment

This section would require the Secretary of Defense to conduct a comprehensive assessment of Department of Defense policies relating to telecommunications and video surveillance services and equipment from foreign contractors and subcontractors, and identify means to mitigate threats through the debarment and suspension process. This section would also require the Secretary of Defense to write regulations and internal Department policies and expectations for contractor cooperation based on findings of the assessment, not later than 180 days after the date of the enactment of this Act. This section would strengthen the detection, avoidance, notification, and remediation of suspect covered equipment and services in the Department's supply chain.

Section 806—Repeal of Continuation of Data Rights during Challenges

This section would repeal section 866 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232). Section 866 provided authority, in addition to existing authority, for the government to use non-

commercial technical data during a period of challenge in an agency Board of Contract Appeals or the U.S. Court of Federal Claims under certain circumstances.

Section 807—Repeal of Authority to Waive Acquisition Laws to Acquire Vital National Security Capabilities

This section would repeal section 806 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92), which allowed the Secretary of Defense to waive any provision of acquisition law or regulation in certain circumstances.

Section 808—Repeal of Transfer of Funds Related to Cost Overruns and Cost Underruns

This section would repeal an annual requirement for the Secretary of each military department to pay a penalty for cost overruns on covered major defense acquisition programs of the military department. Under the requirement, the Secretary of each military department was required to reduce research, development, test and evaluation, or procurement accounts up to \$50.0 million at each military department every fiscal year. The funds were then credited to the Rapid Prototyping Fund established pursuant to section 804 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92).

SUBTITLE B—AMENDMENTS TO GENERAL CONTRACTING AUTHORITIES, PROCEDURES, AND LIMITATIONS

Section 810—Modifications to the Middle Tier of Acquisition Programs

This section would amend section 804 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) by directing the Secretary of Defense to develop a process to provide the Director of Operational Test and Evaluation, the Director of Cost Assessment and Program Evaluation, and the Under Secretary of Defense for Research and Engineering access to all technical data, records, and information necessary to evaluate the technical maturity of acquisitions carried out under the rapid prototyping and rapid fielding authority. This section would also clarify that no program under this authority shall be the same size or exceed the dollar value of a major defense acquisition program, unless a waiver is granted from the Secretary of Defense.

Section 811—Rates for Progress Payments or Performance-Based Payments

This section would require the Secretary of Defense to provide congressional defense committees with a notice of determination and to notify the public through the Federal Register before initiating changes to contract finance rates for progress payments or performance-based payments. This section would

also require that the Secretary of Defense not use rates that are lower than the rates provided by the Secretaries of the Federal agencies listed in section 2302 of title 10, United States Code.

Section 812—Additional Requirements for Negotiations for Noncommercial Computer Software

This section would amend section 2322a of title 10, United States Code, and codify existing Defense Federal Acquisition Regulations on noncommercial software rights as well as mandate, to the maximum extent practicable, that specially negotiated licenses be used for weapon systems noncommercial software.

Section 813—Responsibility for Data Analysis and Requirements Validation for Services Contracts

This section would amend section 2329 of title 10, United States Code, to specify that the Secretary of Defense act through the Under Secretary of Defense (Comptroller) and Director of Cost Assessment and Program Evaluation to collect data and information annually on the amount contracted for services procured by the Department of Defense, which would be included in the Future Years Defense Program submitted to Congress.

Section 814—Annual Reports on Authority to Carry Out Certain Prototype Projects

This section would amend section 2371b of title 10, United States Code, by adding a new section requiring the Secretary of Defense to annually submit a report to the congressional defense committees on the activity carried out under the authority to use other transaction authorities for prototype projects and any deviations from implementing guidance.

Section 815—Supply Chain Risk Mitigation Policies to Be Implemented through Requirements Generation Process

This section would amend section 807 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) to require the Secretary of Defense to develop tools for supply chain risk mitigation policies during the requirements generation process.

The committee notes that supply chain risk issues have grown in importance as the U.S. defense acquisition supply base has become increasingly global. The committee further recognizes that supply chain risk mitigation is requirements-specific and should be addressed early in the acquisition process to allow for tailoring where appropriate.

Section 816—Enhanced Post-Award Debriefing Rights

This section would amend section 818 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91), which required post-award debriefings of the Department of Defense rating for each evaluation criteria and overall award decision, by reducing the award threshold for comprehensive debriefings from \$100.0 million to \$50.0 million.

Section 817—Standardizing Data Collection and Reporting on Use of Source Selection Procedures by Federal Agencies

This section would repeal portions of section 2305 note of title 10, United States Code, and section 3701 note of title 41, United States Code, which required the Government Accountability Office (GAO) to provide an annual report on the use of lowest price technically acceptable (LPTA) source selection procedures by the Department of Defense and civilian agencies, respectively. These provisions presumed that the Department and the Office of Federal Procurement Policy (OFPP) would revise the Defense Federal Acquisition Regulations Supplement or the Federal Acquisition Regulation within the timeframes established in the enabling legislation. GAO has twice reported that the Department has not yet implemented the source selection criteria provided by Congress. The committee also understands that the OFPP is just beginning the process to draft implementing regulations for civilian agencies despite the mandate to do so within 120 days of the enactment of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232). The committee notes that until the Department and OFPP issue implementing regulations, GAO will not have new information regarding agencies' use of LPTA and whether contracting officers are using LPTA appropriately.

This section would also require revisions to the Federal Procurement Data System (FPDS), or any successor systems, to facilitate the collection of data on source selection procedures used in awarding contracts and other relevant contract actions, such as task and delivery orders issued under indefinite delivery-indefinite quantity contracts. Under this section, the Administrator of General Services, in coordination with the OFPP would determine appropriate revisions to the FPDS within the 180 days provided for under this section. The committee notes that this revision should be feasible, as the FPDS already collects information on whether contracts were awarded using the sealed bidding process, which accounts for a relatively small percentage of the total contracts awarded each year. The committee expects that the new information to be collected would include, at a minimum, whether the contract awarded or order issued was made using LPTA or best value contracting methods, or some other procedure.

SUBTITLE C—PROVISIONS RELATING TO ACQUISITION WORKFORCE

Section 820—Defense Acquisition Workforce Certification and Education Requirements

This section would amend section 1701a of title 10, United States Code. The committee notes that the Department of Defense could better prepare its acquisition workforce by modernizing its certification process to emphasize professional skills that are transferable across the workforce and industry. The Secretary of Defense is authorized to implement the program based on third-party accredited, nationally or internationally recognized standards, where they exist, or through entities outside the Department, if the Secretary determines that to be the best approach.

This section also would amend section 1724 of title 10, United States Code, and strike the requirement for contracting officers to have completed at least 24 semester credit hours (or the equivalent) of study from an accredited institution of higher education, and make conforming amendments to section 1732 of title 10, United States Code. The committee notes that the Department has raised the professionalism of its acquisition workforce since enactment of the Defense Acquisition Workforce Improvement Act in 1990 and the amendments would allow the Department the flexibility to establish the specific educational requirements that should be applied to a particular workforce career field.

This section would also amend title 10, United States Code, by modifying several sections of chapter 87 to institutionalize career paths for all acquisition workforce career fields, and by inserting a new section 1765 to develop competencies for every acquisition career field. The committee is aware that while chapter 87 had general career path requirements, none specifically applied to all acquisition career fields or mandated recommended attributes, such as key work experience. Section 1721, as amended would be a key factor in the success of this implementation and would require the Department to identify which specific career fields represent the acquisition workforce in order to better institutionalize career paths throughout all acquisition career fields. The committee recognizes the scope of the new section 1765 is designed to establish proficiency standards throughout the acquisition workforce in an effort to qualify and assess the technical and nontechnical competencies for all acquisition career fields.

Lastly, this section would amend section 1721 of title 10, United States Code, to include foreign military sales personnel as part of the acquisition workforce.

Section 821—Public-Private Exchange Program for the Acquisition Workforce

This section would create a two-way exchange program between the Department of Defense acquisition workforce and private sector companies. The committee recognizes that exchange programs between the public sector and the private sector could benefit the Federal Government and private sector companies alike, as evinced by the creation of a public-private talent exchange in the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328). The committee recognizes that the Department's willingness to support those employees who participate in the exchange program and promote the further development of their careers would be essential to the success of the program.

The committee is aware that the Department's previous efforts to implement such exchange programs were undermined by structural disincentives for key stakeholders. The committee notes that the new statute would eliminate these disincentives, thereby paving the way for greater participation among the acquisition workforce. In particular, the committee notes that the new statute would preclude the use of a private sector employee's participation in the exchange program, in and of itself, as the basis of an organizational conflict-of-interest complaint.

This section would make conforming amendments to section 1705 of title 10, United States Code, to permit the use of the Defense Acquisition Workforce Development Fund for the exchange program, and to section 1599g of title 10, United States Code, to exclude members of the acquisition workforce from the Department-wide talent exchange.

Section 822—Incentives and Consideration for Qualified Training Programs

This section would amend chapter 141 of title 10, United States Code, by adding a new section to incentivize contractors to invest in workforce development programs to address the workforce needs of the Department of Defense, as determined by the Secretary. This section would also require the Secretary of Defense to include an evaluation of contractor workforce development programs in the contract past performance system.

Section 823—Incentives and Consideration for Utilization of Qualified Apprentices by Prospective Military Construction Contractors

This section would require the Secretary of Defense to develop an apprenticeship workforce incentive program to encourage contractors to meet a 10 percent goal of employing certified and skilled workers who have completed State-mandated, federally funded programs in the relative career fields. This section would also require the Secretary of Defense to include an evaluation of whether the contractor meets this goal in the contractor past performance rating system.

SUBTITLE D—INDUSTRIAL BASE MATTERS

Section 830—Size Standard Calculations for Certain Small Business Concerns

This section would clarify that section 3(a)(2)(C) of the Small Business Act undoubtedly applies to the Small Business Administration (SBA). The section would align the size standards based on data to the Small Business Runway Extension Act of 2018 (Public Law 115-324) by changing the calculation from 3 years to 5 years. This section also would require the SBA to develop a transition plan for small businesses and Federal agencies to help them successfully navigate the transition from the previous 3-year calculation to the new 5-year calculation as mandated and would require that the System for Award Management be updated accordingly.

Section 831—Modifications to Small Business Subcontracting

This section would ensure greater accountability for prime contractors electing to receive subcontracting credit for subcontracting with small businesses at lower tiers, and would provide small businesses with an alternative avenue for nonpayment issues with the prime contractor. This section would clarify that large prime contractors have the ability to receive subcontracting credit for small businesses at lower tiers; would strengthen the agency's ability to collect and review data regarding prime contractors' achievement of their subcontracting plans; would require the prime contractor to keep and maintain records to demonstrate subcontracting credit claimed; and would implement a new dispute process allowing small subcontractors to bring nonpayment issues to the agency small business advocate.

Section 832—Inclusion of Best in Class Designations in Annual Report on Small Business Goals

This section would allow Congress to obtain critical information regarding the participation of small businesses in specially designated multiple award contracts known as “best in class” contracts. It would require the Small Business Administration (SBA) to report Federal spending made through designated “best in class” vehicles, and to report on the dollars awarded through these vehicles to small businesses. Additionally, this section would require the SBA to report the dollar amount of contracts awarded to HUBZone, women-owned, service-disabled veteran-owned, and socially and economically disadvantaged (also known as 8(a)) small businesses. This section would become effective on the date on which this information becomes available on the appropriate government-run procurement tracking system.

Section 833—Small Business Administration Cybersecurity Reports

This section would require the Small Business Administration to issue reports that assess its cybersecurity infrastructure, including determining the country of origin of its information technology components, and report cyber threats, breaches, and cyber attacks.

Section 834—Cyber Counseling Certification Program for Lead Small Business Development Centers

This section would amend section 21(a) of the Small Business Act by adding Cyber Strategy Training for Small Business Development Centers (SBDCs) and require the Small Business Administrator to establish, or certify, an existing cyber counseling certification program to certify employees at small business development centers (that have directly received a grant from the Administration) to provide assistance to small businesses for planning cybersecurity practices and strategies to

respond to cyber attacks. The Small Business Administration would be authorized to reimburse SBDCs for employee certification costs up to \$350,000 per fiscal year.

Section 835—Exemption of Certain Contracts from the Periodic Inflation Adjustments to the Acquisition-Related Dollar Threshold

This section would amend subparagraph (B) of section 1908(b)(2) of title 41, United States Code, to exempt certain contracts from the periodic inflation adjustments to the acquisition-related dollar threshold.

Section 836—Authorized Official to Carry Out the Procurement Technical Assistance Cooperative Agreement Program

This section would move the management and oversight of the Procurement Technical Assistance Cooperative (PTAC) Agreement Program from the Defense Logistics Agency to the Office of the Under Secretary of Defense for Acquisition and Sustainment. The committee recognizes that PTACs are a critical part of efforts at the Department of Defense to reach new businesses and expand the defense industrial base. As such, the PTAC program should be placed in the Department's Office of Industrial Policy (formerly known as the Office of Manufacturing and Industrial Base Policy), where it would align with their activities.

Section 837—Reauthorization of the Department of Defense Mentor-Protege Program

This section would extend the Department of Defense Mentor-Protege pilot program until fiscal year 2021 for a participating business concern's eligibility to enter into mentor-protege agreements and until fiscal year 2023 for a mentor firm's eligibility for reimbursement related to costs of furnishing developmental assistance to a protege firm. This section also would add additional reporting requirements to better track the businesses that are benefiting both as mentors and proteges.

SUBTITLE E—OTHER MATTERS

Section 840—Report and Database on Items Manufactured in the United States for Major Defense Acquisition Programs

This section would amend chapter 144 of title 10, United States Code, by inserting a new section requiring the Secretary of Defense to submit a report to the congressional defense committees assessing the domestic source content of procurements carried out in connection with major defense acquisition programs. This section would also require the Secretary of Defense to establish an information repository for the collection of domestic source content information to be used for continuous data analysis and program management activities. The section would

express the sense of Congress that any entity of the Department of Defense should purchase only American-made equipment and products where possible.

The committee is interested in ensuring the Department's acquisition processes are in line with, at a minimum, the standards of the Buy American Act of 1933 (Public Law 72-428) and believes the Department should be setting a goal to acquire and procure purely American-made equipment and products to ensure a strong national industrial base to support our warfighters in time of need.

Section 841—Requirements Relating to Selected Acquisition Reports

This section would reestablish the requirement for Selected Acquisition Reports, which summarize key cost and schedule information for major defense acquisition programs (MDAPs) at the Department of Defense.

This section would require the Secretary of Defense to submit a proposal for an alternative reporting methodology for MDAPs with the budget request for fiscal year 2021. The proposal shall also include other programs, such as rapid prototyping or rapid fielding programs, carried out under the authority of section 804 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) and how the Department plans to report cybersecurity and software development metrics.

Section 842—Contractor Science, Technology, Engineering, and Math (STEM) Programs

This section would amend section 862 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81) by requiring that activities conducted under the authority provided in section 862 be considered as allowable community service activities for the purposes of determining allowability of cost on a government contract. The committee is aware that current cost accounting practices provide that the costs associated with certain community service activities be considered as allowable costs on a government contract. The Federal Acquisition Regulation specifically lists blood drives, savings bond drives, and disaster assistance as examples of such allowable community service activities. The committee believes that contractor investments in the science, technology, engineering, and math (STEM) programs covered under section 862 are of service to our communities, increase the health of the defense industrial base, and develop the STEM workforce of the Department of Defense. This section would also make technical corrections and conform the provision to the current organizational structure of the Department of Defense.

Section 844—Requirements Relating to Certain Rail Rolling Stock Procurements and Operations

This section would prevent financial assistance, specifically Federal transit dollars, from being used to award a contract or subcontract for the procurement of

passenger railcars to priority foreign state-owned, -controlled, or -subsidized enterprises (as identified by the Trade Act of 1974). This section would create a certification process for transit agencies to ensure their funds are not being used to purchase rolling stock from a covered manufacturer, with a narrow exception for transportation agencies with a preexisting contract or subcontract with a covered rail rolling stock manufacturer executed prior to the date of the enactment of this Act.

This section also would require that any rail transit service operator develop and execute a plan for identifying and reducing cybersecurity risks. Recipients of Federal transit assistance would be required to review best practices and identify any hardware and software components of new rolling stock assets that should undergo third-party testing.

Section 1003—Reporting Requirements Relating to Department of Defense Audits

This section would require an annual report ranking each of the military departments and Defense Agencies in order of how advanced they are in achieving auditable financial statements as required by law. This report would include, for the bottom quartile of departments and agencies ranked in the report, an additional report describing the material weaknesses of the reporting entity, underlying causes of the material weaknesses, and a plan for remediation. Section 1032—Prohibition on the Use of Funds for Transfer or Release of Individuals Detained at United States Naval Station, Guantanamo Bay, Cuba, to Certain Countries

This section would prohibit the use of funding authorized to be appropriated or otherwise made available for the Department of Defense during the period beginning on the date of the enactment of this Act and ending on December 31, 2020, to transfer, release, or assist in the transfer or release of any individual detained at U.S. Naval Station, Guantanamo Bay, Cuba, to Libya, Somalia, Syria, or Yemen.

Section 1033—Prohibition on Use of Funds for Transfer to and Detention of
Additional Individuals, Including United States Citizens, at United States Naval
Station, Guantanamo Bay, Cuba

This section would prohibit detention of additional individuals under the law of war or pursuant to a military commission proceeding, and defines additional individuals as individuals to be detained at Guantanamo following the most recent release of a detainee, pursuant to a plea agreement, in May 2018.

This section would also require a plan identifying a disposition other than continued law of war detention at United States Naval Station, Guantanamo Bay, Cuba, for each individual currently detained at Guantanamo.

Section 1034—Sense of Congress regarding the Provision of Medical Care to
Individuals Detained at United States Naval Station, Guantanamo Bay, Cuba

This section would express the sense of Congress that the increasing age of detainees at the U.S. Naval Station, Guantanamo Bay, Cuba, poses challenges for the provision of medical care and that the United States has an ongoing obligation to provide medical care to detainees at Guantanamo that meets appropriate standards of care.

This section would also express the sense of Congress that the Secretary of Defense should take into account the standards of care provided at other relevant facilities, including those administered by the Federal Bureau of Prisons, when determining the policies regarding medical care for detainees at Guantanamo.

SUBTITLE E—MISCELLANEOUS AUTHORITIES AND LIMITATIONS

Section 1044—Modification and Technical Correction of Authority for Deployment
of Members of the Armed Forces to the Southern Land Border of the United States

This section would modify the authority under section 1059 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) to require the Secretary of Defense to fully consider readiness, mission and task alignment to requested support, and ensure that support requirements are inherently governmental when determining the Department of Defense's ability to provide assistance to secure the U.S. southern land border. Additionally, this section would add reporting requirements.

Section 1046—Prohibition on Use of Funds for Construction of a Wall, Fence, or
Other Physical Barrier along the Southern Border of the United States

This section would prohibit the obligation, expense, or use of funds, that have been authorized to be appropriated for national defense in fiscal years 2015 through 2020, to design or carry out a project to construct, replace, or modify a wall, fence or other physical barrier along the international border between the United States and Mexico.

Section 1047—Expenditure of Funds for Department of Defense Intelligence and Counterintelligence Activities

Further, this section would require the Secretary of Defense to provide a report of the expenditures covered by this authorization for each of the fiscal years 2020 through 2025.

This section would provide additional authorization in response to section 1041 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91), which required the Secretary of Defense to clarify use of emergency and extraordinary expenses (EEE) for intelligence and counterintelligence (CI) activities that were determined not to be of an emergent or extraordinary nature. This modification of section 423 of title 10, United States Code, attempts to normalize limited, controlled spending for the Department's intelligence and CI activities while preserving the EEE construct for those intelligence and CI expenses that are truly emergent and extraordinary, and cannot be classified with an established Department of Defense funding program.

Section 1062—Elimination of Requirement to Submit Reports to Congress in Paper Format

This section would enable the Department of Defense to provide reports required by the Congress in an electronic format rather than a paper format. By eliminating the requirement of the delivery of congressional reports in paper

format, the Department of Defense would be able to streamline the reporting process both within the Department and in delivery of its reports to the Congress.

Section 1063—Modification of Annual Report on Civilian Casualties in Connection with United States Military Operations

This section would modify section 1057 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91), as most recently amended by section 1062 of the John S. Section 1086—Assessment of Standards, Processes, Procedures, and Policy Relating to Civilian Casualties

This section would require the Secretary of Defense to enter into an agreement with a federally funded research and development center for conduct of an independent assessment of the sufficiency of Department of Defense standards, processes, procedures, and policy relating to civilian casualties resulting from United States military operations.

This section would limit the use of fiscal year 2020 funds for bilateral military-to-military cooperation between the Government of the United States and Russia until the Secretary of Defense, in coordination with the Secretary of State, provides a certification to appropriate congressional committees relating to certain actions by Russia. This extension includes the rule of construction that was established in Public Law 115-232, indicating that nothing in the provision shall be construed to limit bilateral military-to-military dialogue for the purpose of reducing the risk of conflict.

Section 1233—Prohibition on Availability of Funds Relating to Sovereignty of the Russian Federation over Crimea

This section would extend by 1 year the prohibition imposed by section 1245 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92), as amended by section 1241 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232). This section would also require a one time report on the Initiative.

Section 1242—Extension and Modification of Report on Military and Security Developments Involving the Democratic People's Republic of Korea

Section 1244—Report on Direct, Indirect, and Burden-Sharing Contributions of Japan and South Korea

This section would require the Secretary of Defense to provide a report to the congressional defense committees, Senate Committee on Foreign Relations, and House Committee on Foreign Affairs, not later than March 1, 2020, and March 1, 2021, on the direct, indirect, and burden-sharing contributions of Japan and South Korea to support overseas military installations of the United States and U.S. Armed Forces deployed to or permanently stationed in Japan and South Korea.

The committee believes that U.S. national security is enhanced by the presence of U.S. forces in Japan and South Korea. Further, the committee values

United States' alliances with Japan and South Korea, based on shared values of democracy, the rule of law, free and open markets, and respect for human rights.

The committee reaffirms United States' commitment to these alliances with Japan and South Korea, which are cornerstones for the preservation of peace and stability in the region and throughout the world. The committee recognizes the substantial financial commitments of Japan and South Korea to the maintenance of U.S. forces in these countries, making them among the most-significant burden-sharing partners of the United States.

Section 1245—Report on Strategy on the Philippines

This section would require the Secretary of Defense, in consultation with the Secretary of State, to provide a report to the congressional defense committees, Senate Committee on Foreign Relations, and House Committee on Foreign Affairs, not later than 120 days after the date of the enactment of this Act on the Department of Defense's objectives and strategy for achieving such objectives for the Philippines. The report would include a description of U.S. national security interests and objectives furthered by the Mutual Defense Treaty with the Philippines, a description of the regional security environment, and a discussion of Department of Defense support or assistance programs, partners, and authorities in the Philippines.

SUBTITLE F—MATTERS RELATING TO EUROPE AND NATO

Section 1252—Modification and Extension of Future Years Plan and Planning Transparency for the European Deterrence Initiative

This provision would require an annual “Future Years Plan” for the European Deterrence Initiative (EDI) as previously required by section 1273(a) of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) and require the Department’s budget request materials for EDI to include a display that clearly and concisely communicates to Congress, at an appropriate level of detail, which budget lines constitute EDI. The committee seeks to conduct oversight and require better planning for EDI. The committee believes enabling cross-reference of requested EDI priorities and budget activities would enhance transparency, strengthen congressional oversight, and facilitate Congress’s ability to support European deterrence needs.

Section 1253—Protection of European Deterrence Initiative Funds from Diversion for Other Purposes

3 **SEC. 801.[Log 69933] ESTABLISHMENT OF ACQUISITION**
4 **PATHWAYS FOR SOFTWARE APPLICATIONS**
5 **AND SOFTWARE UPGRADES.**

6 (a) GUIDANCE REQUIRED.—Not later than March 1,
7 2020, the Secretary of Defense shall establish guidance
8 authorizing the use of acquisition pathways described in
9 subsection (b) for the rapid acquisition of software appli-
10 cations and software upgrades that are intended to be
11 fielded within one year. A contract awarded under this sec-
12 tion—

13 (1) shall be in an amount equal to or less than
14 \$50,000,000; and

15 (2) may be entered into for a period of not
16 more than one year.

17 (b) SOFTWARE ACQUISITION PATHWAYS.—The guid-
18 ance required by subsection (a) shall provide for the use
19 of the following two acquisition pathways:

20 (1) APPLICATIONS.—The applications pathway
21 shall provide for the use of rapid development and
22 implementation of software applications to be used
23 with commercially available hardware.

24 (2) UPGRADES.—The upgrades pathway shall
25 provide for the rapid development and insertion of

1 software upgrades for embedded weapon systems or
2 another hardware system solely used by the Depart-
3 ment of Defense.

4 (c) GENERAL REQUIREMENTS.—The guidance re-
5 quired by subsection (a) shall provide for—

6 (1) the use of proven technologies and solutions
7 to continuously engineer, update, and deliver capa-
8 bilities in software; and

9 (2) a streamlined and coordinated require-
10 ments, budget, and acquisition process that results
11 in the rapid fielding of software applications and
12 software upgrades.

13 (d) EXPEDITED PROCESS.—

14 (1) IN GENERAL.—An acquisition conducted
15 under the guidance required by subsection (a) shall
16 not be subject to the Joint Capabilities Integration
17 and Development System Manual and Department
18 of Defense Directive 5000.01, except to the extent
19 specifically provided in such guidance.

20 (2) REQUIREMENTS PROCESS.—The guidance
21 required by subsection (a) shall provide that the re-
22 quirements for acquisition of software applications
23 and software upgrades—

24 (A) are developed, refined, and prioritized
25 on an iterative basis through continuous partici-

1 pation and collaboration by users, testers, and
2 requirements authorities;

3 (B) include an identification of the need
4 for, and users of, the software to be acquired
5 and a rationale for how the software will sup-
6 port increased efficiency of the Department of
7 Defense;

8 (C) are stated in the form of a summary-
9 level list of vulnerabilities in existing software
10 systems and desired features or capabilities of
11 the software to be acquired; and

12 (D) consider issues related to lifecycle
13 costs, systems interoperability, and logistics
14 support if the developer of the software to be
15 acquired stops providing support.

16 (4) EXECUTION OF RAPID ACQUISITIONS.—The
17 Secretary shall ensure that—

18 (A) an acquisition conducted under the
19 guidance required by subsection (a) is sup-
20 ported by an entity capable of regular auto-
21 mated testing of the source code of the software
22 to be acquired and that such entity is author-
23 ized to buy storage, bandwidth, and computing
24 capability as necessary;

1 (B) the Department of Defense can collect
2 and analyze the testing data described in sub-
3 paragraph (A) to make decisions regarding soft-
4 ware acquisition and oversight;

5 (C) the Director of Operational Test and
6 Evaluation and the project manager appointed
7 under paragraph (5) design test cases to ensure
8 that the entity described in subparagraph (A)
9 can test the software to be acquired to ensure
10 such software meets the requirements of the
11 contract;

12 (D) the project manager appointed under
13 paragraph (5) closely monitors the progress of
14 an acquisition conducted under the guidance re-
15 quired by subsection (a);

16 (E) an independent cost estimate is con-
17 ducted that considers—

18 (i) the iterative process of the develop-
19 ment of the software to be acquired; and

20 (ii) the long-term value of the soft-
21 ware to be acquired to the Department of
22 Defense, not based on the value of indi-
23 vidual lines of source code of the software;

24 (F) the performance of fielded versions of
25 the software to be acquired are demonstrated

1 and evaluated in an operational environment;
2 and

3 (G) performance metrics of the software to
4 be acquired, such as metrics relating to when
5 the software can be fielded, delivery capabilities
6 of the software (including speed of recovery
7 from outages and cybersecurity vulnerabilities),
8 and assessments and estimations of the size
9 and complexity of such software, are automati-
10 cally generated on a continuous basis and made
11 available to the Department of Defense and the
12 congressional defense committees.

13 (5) ADMINISTRATION OF SOFTWARE ACQUISI-
14 TION PATHWAYS.—The guidance required by sub-
15 section (a) may provide for the use of any of the fol-
16 lowing streamlined procedures:

17 (A) The service acquisition executive of the
18 military department concerned shall appoint a
19 project manager for each acquisition of software
20 applications and software upgrades, as deter-
21 mined by the service acquisition executive. Such
22 project manager shall be appointed from among
23 civilian employees or members of the Armed
24 Forces who have significant and relevant expe-
25 rience in current software processes.

1 (B) Each project manager shall report
2 with respect to such acquisition directly, and
3 without intervening review or approval, to the
4 service acquisition executive of the military de-
5 partment concerned.

6 (C) The service acquisition executive of the
7 military department concerned shall evaluate
8 the job performance of such manager on an an-
9 nual basis. In conducting an evaluation under
10 this paragraph, a service acquisition executive
11 shall consider the extent to which the manager
12 has achieved the objectives of the acquisition
13 for which the manager is responsible, including
14 quality, timeliness, and cost objectives.

15 (D) The project manager shall be author-
16 ized staff positions for a technical staff, includ-
17 ing experts in software engineering to enable
18 the manager to manage the acquisition without
19 the technical assistance of another organiza-
20 tional unit of an agency to the maximum extent
21 practicable.

22 (E) The project manager shall be author-
23 ized, in coordination with the users and testers
24 of the software to be acquired, to make trade-

1 offs among lifecycle costs, requirements, and
2 schedules to meet the goals of the acquisition.

3 (F) The service acquisition executive or the
4 Under Secretary of Defense for Acquisition and
5 Sustainment, as applicable, shall serve as the
6 decision authority for the acquisition.

7 (G) The project manager of a defense
8 streamlined acquisition shall be provided a
9 process to expeditiously seek a waiver from
10 Congress from any statutory or regulatory re-

15 (1) IN GENERAL.—A contract entered into pur-
16 suant to the guidance required by subsection (a)—

17 (A) may be awarded within a 90-day pe-

20 period not to exceed one year, to complete the imple-
21 mentation of one or more specified software applica-
22 tions and software upgrades identified during the
23 period of the initial contract. Such an option may
24 not be in an amount greater than \$100,000,000

1 **SEC. 1606.[Log 69504] INDEPENDENT STUDY ON PLAN FOR**
2 **DETERRENCE IN SPACE.**

3 (a) FINDINGS.—Congress finds the following:

4 (1) Threats to space systems of the United
5 States have increased and continue to grow.

6 (2) While the United States must invest in ca-

11 (3) The United States is developing new capa-
12 bilities for enhancing resilience of such systems.

13 (4) However, the proper balance between active
14 defense, resilience, and the still lagging investment
15 area of reconstitution to enhance deterrence remains
16 unclear, as does the balance between classified and
17 unclassified activities needed to create deterrence.

18 (5) Independent analysis and assessment is nec-

2 Congress finds the following:

3 (1) White Sands National Monument was es-
4 tablished on January 18, 1933, by President Her-
5 bert Hoover pursuant to the Antiquities Act of 1906
6 (now chapter 3203 of title 54, United States Code).

7 (2) President Hoover proclaimed that the
8 Monument was established “for the preservation of
9 the white sands and additional features of scenic,
10 scientific, and educational interest”.

11 (3) The Monument was expanded by Presidents
12 Roosevelt, Eisenhower, Carter, and Clinton in 1934,
13 1942, 1953, 1978, and 1996, respectively.

14 (4) The Monument contains a substantially
15 more diverse set of nationally significant historical,
16 archaeological, scientific, and natural resources than
17 were known of at the time the Monument was estab-
18 lished, including a number of recent discoveries.

19 (5) The Monument is recognized as a major
20 unit of the National Park System with extraordinary
21 values enjoyed by more visitors each year since 1995
22 than any other unit in the State of New Mexico.

23 (6) The Monument contributes significantly to
24 the local economy by attracting tourists.

25 (7) Designation of the Monument as a national
26 park would increase public recognition of the diverse

- 1 array of nationally significant resources at the
- 2 Monument and visitation to the unit.

CH-47F Chinook Block II

The budget request contained \$18.2 million in advanced procurement for the CH-47F Block II program. The CH-47F Block II program is designed to upgrade the current CH-47F Block I heavy-lift rotorcraft to improve readiness and commonality, extend the useful life of the Block I version, and restore additional payload capacity for the airframe. The committee understands the budget request fully funds the completion of the engineering and manufacturing development (EMD) phase of the Block II program, and that subject to successful completion of the EMD phase, the Army plans to conduct a Milestone C low-rate production decision beginning in fiscal year 2021. However, the committee notes the current Future Years Defense Program (FYDP) provides no follow-on procurement funding for the CH-47 Block II program. Further, the committee notes that the formal analysis of alternatives for the CH-47 Block II indicated the Army must begin to remanufacture CH-47 Block I rotorcraft between fiscal years 2024 and 2028 and sustain full-rate production of 12 aircraft per year by fiscal year 2030 in order to maintain fleet readiness. Given the lack of programmed funding in the FYDP for CH-47 Block II production, the committee is concerned about potential impacts this could have on the heavy-lift rotorcraft industrial base, as well as the effects this could have on the Army's long-term plans to maintain fleet readiness beyond the FYDP.

Therefore, the committee recommends \$46.2 million, an increase of \$28.0 million, in CH-47 Helicopter advanced procurement for the CH-47F Block II aircraft.

Further, the committee directs the Secretary of the Army to provide a briefing to the House Committee on Armed Services by September 2, 2019, on the potential readiness impacts to the current CH-47F fleet should Block II production be delayed post-FYDP, a cost-benefit analysis comparing CH-47 Block II upgrade program to CH-47F remanufacture efforts, the impacts to current MH-47G aircraft production given the delay of Block II production, analysis used to assess the strategic risk to the industrial base including the supplier base, and the current strategy for modernizing the heavy-lift rotorcraft fleet.

AIRCRAFT PROCUREMENT, NAVY

Items of Special Interest

Recapitalization of Navy Reserve P-3C squadrons

The budget request contained \$1.2 billion for six P-8A Poseidon aircraft. The budget request for fiscal year 2020 did not take into account the increased warfighter requirement of 21 additional P-8A aircraft. This increase is driven by the proliferation of adversarial submarine fleets and their increasingly active operational tempo. The new requirement includes 12 aircraft to recapitalize the two maritime patrol and reconnaissance squadrons assigned to the Navy Reserve. These squadrons currently operate legacy P-3C Orion aircraft and the Chief of Navy Reserve estimates they will decommission by 2023 unless they are outfitted with new aircraft. The committee is encouraged by the Navy's recognition of the Navy Reserve force and the contribution they can provide to the increased requirement for the P-8A. However, the committee was discouraged that the Navy failed to budget for the additional aircraft to meet the warfighting requirement.

Therefore the committee directs the Secretary of the Navy to provide a briefing to the House Committee on Armed Services by March 1, 2020, that outlines a plan to recapitalize the two Navy Reserve squadrons with P-8A aircraft prior to 2023. The briefing should include estimated acquisition costs, acquisition timelines, aircraft fielding schedules, and manpower impacts to the Navy Reserve. The committee also notes that this information should have been briefed at the beginning of the budget cycle.

The committee recommends \$1.75 billion for P-8A procurement, an increase of \$541.2 million, to procure three additional aircraft in fiscal year 2020.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

Items of Special Interest

Multi-spectral thermal mitigation technologies

The budget request contained \$118.5 million in PE 63118A for soldier lethality advanced technologies.

The committee is aware that the military services have established baseline standards for flame resistant uniforms that provide near-infrared thermal sensor protection for service members who are deployed in hostile areas. The committee understands that recent technical developments in sensor technologies and sensor mitigation are advancing at a pace well ahead of the current research, development, and procurement efforts. As a result, long-range detection and identification of our service members from hostile near-peer as well non-state actors is an emerging force protection threat. As such, the committee encourages the military services to explore multi-spectral sensor mitigation technologies, and to incorporate them into current and future uniform requirements and testing in use by the armed services.

Therefore, the committee directs the Secretary of the Army, in coordination with the Secretaries of the Navy and the Air Force, to provide a briefing to the House Committee on Armed Services by March 1, 2020, on the infra-red protection of current uniform standards against emerging sensor technologies, including an analysis of the feasibility, availability, and cost of material solutions that could mitigate these emerging thermal sensor technologies.

Further, the committee recommends an increase of \$5.0 million in PE 63118A for soldier lethality advanced technologies.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, DEFENSE-WIDE

Items of Special Interest

Cyber institutes at senior military colleges

The budget request included no funds for cyber institutes.

Section 1640 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232) authorized the Secretary of Defense to establish cyber institutes at each of the senior military colleges for purposes of accelerating and focusing the development of foundational expertise in critical cyber operational skills for future military and civilian senior leaders. The committee understands that the cyber institutes have not yet been established, but that the senior military colleges, as defined by section 1640, have a formal proposal for establishment.

The committee notes that women and minorities remain underrepresented in the cyber security sector in both military and civilian settings. To increase diversity and opportunity, the committee expects the Department to use the cyber institutes to conduct effective outreach, recruiting, and retention programs focused on increasing matriculation in and completion of cyber security programs by women and underrepresented minorities. The committee directs the Secretary of Defense to provide a briefing to House Committee on Armed Services not later than 180 days after the designation of cyber institutes on the strategy of each cyber institute to achieve diversity in the cyber security sector.

The committee recommends an increase of \$12.0 million in PE 303140D8Z for such institutes in order to facilitate development of critical cyber operational skills for future civilian and military leaders.

Historically black colleges and universities and minority serving institutions

The budget request contained \$30.7 million in PE 61228D8Z for research work with historically black colleges and universities and minority serving institutions (HBCU/MI).

The committee recognizes the important role this program plays in bolstering the research capabilities at HBCU/MIs. Not only is such work important in meeting the research needs of the Department of Defense, the committee also

believes it provides an added benefit by diversifying the Department's supply of scientists, engineers, and researchers working on the its most challenging problems.

The committee also acknowledges the ongoing efforts of the Department to increase the participation of women from underserved populations in science, technology, engineering, and mathematics (STEM) related areas of research. The committee urges the Department to continue funding for Center of Excellence efforts at historically black colleges and universities that support training and education of minority women in STEM fields of interest to the military, particularly through research funding, fellowships and internships, and cooperative work experiences at the Defense Laboratories. The committee recommends that the Department consider increasing investments in these kinds of activities in future budgets to support Administration initiatives on HBCU/MIs.

The committee additionally recommends that the Department strengthen its engagement and investments via the quantity and value of grants, studies, technical support contracts, and subcontracts with HBCU/MIs with a goal of elevating the quality of research and scientific activity at those institutions to the R1 and R2 level of the Carnegie Classification of Institutions of Higher Education. Therefore, the committee directs the Under Secretary of Defense for Research and Engineering to submit a report to the congressional defense committees by March 1, 2020, on how the Department can expose HBCU/MIs to new levels of research and scientific problems for the benefit of the Department.

In addition, the committee recommends \$50.7 million, an increase of \$20.0 million, in PE 61228D8Z for additional research between HBCU/MIs, and increased teaming opportunities between these institutions and other research universities with experience supporting the Department's unique requirements. This amount is above the enacted budget of fiscal year 2019.

TITLE III—OPERATION AND MAINTENANCE

ITEMS OF SPECIAL INTEREST

ENERGY ISSUES

Report on Department of Defense and NATO Cooperation on Energy Infrastructure

The committee recognizes that energy security in Europe is a critical enabler to United States military readiness in the region. The committee further appreciates that the United States has economic and national security interests in assisting Central and Eastern European countries in achieving energy security through diversification of energy sources and supply routes. To that end, the committee encourages the Secretary of Defense, in coordination with the Secretary of State, to work with our North Atlantic Treaty Organization (NATO) allies and partners to study vulnerabilities from energy instability in Europe and develop ways to mitigate these vulnerabilities. The committee directs the Secretary of

Defense to provide a report to the House Committee on Armed Services by March 1, 2020, that provides the results of this study. The report shall include at least the following:

- (1) identify and list energy vulnerabilities that impact the military readiness of the United States and its allies in Central and Eastern Europe;
- (2) identify and list vulnerabilities to supply routes that impact the military readiness of the United States and its allies in Central and Eastern Europe;
- (3) assess the Department of Defense's current ability to mitigate and respond to these vulnerabilities;
- (4) identify ways in which the Department can enhance integration and mitigate these vulnerabilities in the future; and
- (5) results of coordination with the Department of State on ways in which diplomatic relationships can be leveraged to provide energy security.

TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

ITEMS OF SPECIAL INTEREST

Assessment of Defense Sustainment Enterprise

The committee directs the Under Secretary of Defense for Acquisition and Sustainment to provide a comprehensive report to the House Committee on Armed Services not later than December 31, 2019, assessing the defense sustainment enterprise in order to identify the capability of that enterprise to support the National Defense Strategy and alternatives to improve the effectiveness, efficiency, and affordability of the overall defense sustainment enterprise. The report shall include:

- (1) the appropriate balance of leadership attention to acquisition and sustainment;
- (2) organizational structures;
- (3) the national industrial base (including both organizations organic to the Department of Defense and commercial organizations), including the right size and composition of the industrial base regarding organic and commercial technology to take best advantage of all capabilities in view of the National Defense Strategy, and depot determinations within the industrial base (organic and commercial), focused on warfighting requirements;
- (4) accountability of the Defense Materiel Enterprise for outcomes tied to readiness requirements;
- (5) such other matters as are needed to provide a full and accurate assessment of the defense sustainment enterprise; and
- (6) the Secretary's plan for any steps to be taken to address the cases identified above within the Department of Defense and such recommendations for legislative action as the Secretary considers appropriate as a result of the review.

The committee notes that sustainment currently lacks equal footing with development and procurement during the acquisition phase of a program. The committee further notes that while the Department of Defense must be able to immediately counter multipronged, prolonged threats, the current logistics and sustainment system lacks the agility needed to do so. The committee agrees with the acquisition advisory panel established under section 809 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92), which highlighted in its final report, dated January 15, 2019, a number of concerns related to lack of product support and sustainment management which has led to degraded weapon system readiness, rising sustainment costs, and insufficient supply support.

Assessment of the Use of Tantalum

The committee directs the Under Secretary of Defense for Acquisition and Sustainment to provide a report to the House Committee on Armed Services not later than December 31, 2019, assessing the current use of the critical material tantalum in Department of Defense acquisition programs. The report shall include an assessment of the current levels of tantalum in the National Defense Stockpile and the source countries involved in the purchase of the raw material. The report shall also include information on domestic and foreign sources for both procuring and processing tantalum that the Department has identified. The report submitted shall be classified at levels appropriate to and sufficient for access to data necessary for a comprehensive review of the subject and related information but must include an unclassified summary of findings and recommendations. The Under Secretary may submit comments, if any, to accompany the report's classified or unclassified findings and recommendations.

Assessment of Program Management Structure and Improvements

The committee directs the Secretary of Defense to provide a report to the House Committee on Armed Services not later than December 31, 2019, assessing the acquisition training of program managers. The report shall include a comprehensive plan to improve program management capacity and workforce competency, to include:

- (1) appropriate subject matter experience, education, years of experience, certifications, and other qualifications set forth separately for current Department of Defense employees and personnel in program management positions;
- (2) a plan for career training, including training in leadership, program management, engineering, finance and budgeting, market research, business management, contracting, supplier management, requirement setting and tradeoffs, intellectual property matters, and software;
- (3) a description of benefits using existing human capital flexibility to retain qualified employees, such as student loan repayments, bonuses, or pay banding;

(4) a description of use of the Defense Acquisition Workforce Development Fund (DAWDF) established under section 1705 of title 10, United States Code, to train personnel in program management positions; and

(5) a description of how the program will be administered and overseen by the Secretaries of each military department, acting through the service acquisition executive for the department concerned and integrated with existing program manager development efforts.

The committee notes that this review and plan should facilitate implementation of the portfolio management structure the Department has already undertaken. As the Department works to streamline and improve the defense acquisition system, American National Standards Institute (ANSI)-accredited standards should be a main source for policy updates and guidance around program management. The committee encourages working toward closing any gaps between current Department policy and the ANSI-accredited standards to streamline disparate delivery methods into a common delivery platform that drives consistent performance across the Department and its industrial base while ensuring compliance with Office of Management and Budget Circulars A-11 and A-119 and Public Law 114-264. The committee also notes that DAWDF is a primary funding source for program and project manager training and development, but inconsistent access across the Department that prevents many professionals from accessing this support should be addressed.

Assessment of Training Needs for Non-Acquisition Workforce Personnel

The committee recognizes the importance of non-acquisition workforce personnel who work on acquisitions at the Department of Defense, especially personnel who play a significant role in defining requirements, conducting market research, participating in source selection and contract negotiation efforts, and overseeing contract performance. However, the committee is concerned that the Department has limited visibility into the non-acquisition workforce, including personnel who may not be receiving acquisition training that would enhance their contributions.

The committee directs the Secretary of Defense to provide a report to the House Committee on Armed Services by February 1, 2020, that assesses the unmet demand for courses and modules offered by the Defense Acquisition University. The report shall include an assessment of the fiscal year 2019 courses and modules offered by Defense Acquisition University, the extent that non-acquisition workforce are taking acquisition training, and the courses and modules that have wait lists by the start of the course or module. The report shall also address the number of courses and modules with wait lists as well as the number and type of non-acquisition personnel on the wait lists, including staff who support foreign military sales processes.

Further, the report should include plans for how the Department will meet the training needs for non-acquisition workforce personnel. The report should

address how the Department will identify and track non-acquisition workforce personnel who play a significant role in the acquisition process. Lastly, the report should also address the extent to which additional acquisition training is needed for non-acquisition workforce personnel, including the types of training needed, the positions that need the training, and any challenges to delivering necessary additional training.

Comptroller General Report on Procurement Technical Assistance Centers

The committee notes that little is known about the effectiveness of the Procurement Technical Assistance Program and its centers, known as Procurement Technical Assistance Centers (PTAC), in helping businesses pursue and perform under contracts with the Department of Defense, other Federal agencies, State and local governments, and government prime contractors. The committee is concerned that these centers have not been utilized to their fullest capacity to expand the number of businesses capable of participating in government contracts and whether they duplicate services available elsewhere.

Therefore, the committee directs the Comptroller General of the United States to assess the services that PTACs provide to businesses seeking participation in Federal procurement. The review shall address:

- (1) the number of PTACs and their geographic distribution;
- (2) what is known about the number of businesses that are assisted annually by PTACs;
- (3) how businesses obtain access to PTAC services, including through procurement events sponsored by other agencies (for example, matchmaking events), classroom instruction, and counseling;
- (4) training requirements and their implementation for PTAC staff members providing services to businesses;
- (5) the mechanism used to determine PTAC funding;
- (6) what statistics are collected to measure the performance and effectiveness of PTACs; and
- (7) any other matters deemed important by the Comptroller General.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than March 2, 2020, on the Comptroller General's preliminary findings, and to submit a final report to the congressional defense committees on a date agreed to at the time of the briefing.

Comptroller General Report on the Joint Capabilities Integration and Development System Timelines

The committee notes that there have been longstanding concerns about the effectiveness and efficiency of the Joint Capabilities Integration and Development System (JCIDS) process. In 2008, the Government Accountability Office (GAO) found that most of the capability proposals that had gone through the process were approved, and that the process was not effective in identifying and prioritizing

warfighting needs from a joint, department-wide perspective at the Department of Defense (DOD). Since that time, GAO has made numerous recommendations to improve DOD's ability to prioritize joint capability needs.

The National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) modified the responsibilities of the Joint Requirements Oversight Council (JROC), which oversees the JCIDS process, to focus on critical joint military capabilities. The Act also generally designated non-joint performance requirements as the responsibility of the Chief of Staff of the military service concerned and stated that these performance requirements were not required to be validated by the JROC. The committee is aware that the Joint Staff began implementing revised procedures for the JCIDS process effective in November 2018 to address these modifications.

Therefore, the committee directs the Comptroller General of the United States to assess the effects of the recent revisions to the JCIDS process. At a minimum, the review shall address:

- (1) how the JCIDS process has been revised to address the modifications to the requirements process subsequent to the National Defense Authorization Act for Fiscal Year 2017;

- (2) the extent to which joint performance requirements have been established and validated by the JROC since revised procedures were implemented and the timeframes associated with validating those requirements;

- (3) the extent to which the recent revisions to the process met anticipated goals and created challenges; and

- (4) the extent to which the military services have assessed whether they have effective processes and sufficient qualified workforces to perform their requirements development and validation responsibilities.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than December 1, 2020, on the Comptroller General's preliminary findings, and to submit a final report to the congressional defense committees on a date agreed to at the time of the briefing.

Comptroller General Report on the Use of Fixed-Price Incentive Contracts

The committee notes that the Department of Defense has increasingly favored the use of fixed-price incentive (FPI) type contracts, particularly for the development and initial production of major defense acquisition programs (MDAPs). In response to guidance issued by the Department, the military services have generally incorporated FPI type contracts into requests for proposals for both the development and early production of their major weapons systems.

The committee is concerned by the lack of information on the relative benefits and costs associated with the Department's increased reliance on FPI contracts, including for Foreign Military Sales (FMS). Therefore, the committee directs the Comptroller General of the United States to submit a report to the congressional defense committees not later than July 31, 2020, on the use of FPI

type contracts for major systems within the Department since 2010. The report shall address, but not be limited to, the following elements:

(1) the number of FPI and firm-fixed-price (FFP) contracts awarded by the Department since 2010;

(2) a comparison of the average length of time for the Department to negotiate FPI and FFP contracts;

(3) a comparison of the average length of time for the Department to close out FPI and FFP contracts;

(4) a comparison of the average costs to the Department and contractor to close out FPI and FFP contracts; and

(5) the number of times the Department has transitioned to FFP contracts when actual costs on prior related contracts were within 3-4 percent of negotiated costs.

The report shall also address certain elements unique to contracting in support of FMS cases, including:

(1) the number of times the Department used a waiver or exception to use a contract type other than FFP to award an FMS contract;

(2) the number of FMS contracts or contracts with FMS-specific contract line item numbers (CLINs) issued by the Department on an FPI versus FFP basis;

(3) the number of the above FMS FPI contracts and CLINs that have been closed out;

(4) the procedure for closing out the above FMS FPI contracts and CLINs; and

(5) how the Department addresses cost underruns or overruns on FMS FPI and FFP contracts and CLINs.

The committee further directs the Comptroller General to provide a briefing to the House Committee on Armed Services not later than February 3, 2020, on the Comptroller General's preliminary findings.

Defense Production Act Title III Funding

The committee directs the Under Secretary of Defense for Acquisition and Sustainment to submit a report to the House Committee on Armed Services not later than December 31, 2019, on any legal or resource barriers to the expeditious investment of appropriated Defense Production Act (DPA) Title III funds, including the requirement for a non-delegable Presidential determination. The report shall identify methods to invest in new technologies consistent with Department of Defense modernization priorities. The committee recognizes the value of the DPA Title III program in investing in domestic production capabilities critical to our national defense and urges the DPA Title III office to explore investment in innovative technologies consistent with the military services' modernization priorities, including for operating in contested environments.

Insight Regarding Use of Lowest Price Technically Acceptable Source Selection Criteria

The committee recognizes that there is a continued need for insight and transparency regarding the extent to which lowest price technically acceptable (LPTA) source selection criteria are used by executive agencies. The committee also notes that the Department of Defense has not revised the Defense Federal Acquisition Regulations Supplement (DFARS) nor has the Office of Federal Procurement Policy (OFPP) revised the Federal Acquisition Regulation (FAR) to reflect the revised LPTA source selection criteria specified in the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) and John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232), respectively. The committee remains interested in the Department's and the OFPP's efforts to verify that the use of LPTA source selection criteria is appropriate.

Therefore, the committee directs the Secretary of Defense to provide a briefing to the congressional defense committees by March 1, 2020, on the status of Department efforts to revise the DFARS, issue related guidance to implement the statutory criteria, and ensure that its contracting officers are considering these criteria.

The committee also directs the Administrator of the U.S. General Services Administration (GSA) to provide a briefing to the congressional defense committees, the House Committee on Oversight Reform, and the Senate Committee on Homeland Security and Governmental Affairs by March 1, 2020, on the status of efforts to update the Federal Procurement Data System, or any successor systems, to collect data on source selection procedures used in awarding contracts. In addition, the committee directs the Administrator of GSA to provide a briefing to these committees by June 30, 2020, on the status of its efforts to revise the FAR and ensure that contracting officers in civilian agencies are considering the statutory criteria applicable to them.

Procurement Technical Assistance Centers Training Standards

The committee supports the efforts of the Department of Defense to provide individualized, tailored training to meet the needs of Procurement Technical Assistance Centers nationwide. The committee is aware of and encourages the Defense Logistics Agency's work in consultation with the Association of Procurement Technical Assistance Centers and its members to support and enable effective training for the Procurement Technical Assistance Centers, but believes that formal, regularly updated standards would further advance these efforts.

The committee directs the Director of the Defense Logistics Agency to provide a briefing to the House Committee on Armed Services by December 1, 2019, on training standards required for staff who work at Procurement Technical Assistance Centers, including training offered by the Defense Acquisition University. The briefing should identify the training curriculum to meet those standards, training curriculum that needs to be developed, and the plan to deliver the training. Finally, the briefing should include the Defense Logistics Agency

method to track training completion for the Procurement Technical Assistance Center staff.

Report on Domestic Nonavailability Waiver Process

The committee directs the Assistant Secretary of Defense for Sustainment to provide a briefing to the House Committee on Armed Services not later than December 31, 2019, on the domestic nonavailability waiver process currently used by the Department of Defense. Such a briefing shall include:

(1) the Department's process to inform existing suppliers about the waiver process and guide applicants through the process;

(2) the Department's process to find domestic suppliers after a waiver has been requested;

(3) the Department's process to review previously granted waivers to determine if domestic options not previously available for supply are now available;

(4) the Department's efforts to get feedback from private industry on the waiver process, both from suppliers submitting an application for a waiver and from domestic suppliers who believe that they can provide an item deemed domestically nonavailable; and

(5) a list of all domestic nonavailability determinations and national security waivers granted under sections 2533a and 2533b of title 10, United States Code, since January 1, 2014.

Review of Conflicts of Interest in Organizational Analysis of the Department of Defense

The committee recognizes the importance of assessing the effectiveness of organizations across the Department of Defense to validate their missions and functions, identify metrics to measure performance, and determine areas for improvement. The committee notes that any assessments should examine the risks and legal and ethical considerations associated with combining functions or using commercial providers to carry out certain functions. The committee is also aware that the Secretary of Defense is required to conduct joint reviews and submit reports regarding the Defense Contract Audit Agency, Defense Contract Management Agency, and Defense Finance and Accounting Service pursuant sections 925 and 926 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115-232).

Therefore, the committee directs the Secretary of Defense, acting through the Chief Management Officer of the Department of Defense, to submit risk assessments to the congressional defense committees not later than March 1, 2020, to supplement the reports required by sections 925 and 926 of Public Law 115-232. The risk assessments should reflect the Department's analysis of potential combination of functions with each other or the use of commercial providers, as

applicable. The risk assessments should include analysis of the legal and ethical implications of:

- (1) conflict of interest considerations;
- (2) the risks posed to governmental interests and the public when “closely associated with inherently governmental” functions as defined in section 2383 of title 10, United States Code, are performed by commercial providers;
- (3) the risks to mission failure when “critical” functions as defined in section 2461 of title 10, United States Code, are performed by commercial providers;
- (4) the risks of creating an “employer-employee relationship” through the use of “personal services contracts,” whether authorized by statutory exception (e.g., section 129b of title 10, United States Code) or otherwise prohibited; and
- (5) the application of each of the general ethical principles in 5 Code of Federal Regulation section 2635.101(b).

Small Business Procurement Specialists at Military Installations

The committee recognizes the vital service that small business procurement specialists provide to small businesses seeking to do business with the Department of Defense. Further, the committee notes that small business procurement specialists located on installations are best equipped to understand the products and services that local communities can provide to the U.S. Government. However, the committee is concerned that the Department of the Army is considering the realignment and potential consolidation of small business procurement resources without assessing and articulating the tradeoffs, such as the impact on minority-owned small businesses.

Therefore, the committee directs the Secretary of the Army to submit a report to the House Committee on Armed Services by February 1, 2020, on the Army's strategy for managing and allocating its small business procurement specialists. The report shall:

- (1) reflect alternate staffing models that the Army is considering or implementing, such as regional or national plans to centralize resources at a single site instead of maintaining the on-installation specialist model;
- (2) explain, where applicable, how the Army serves or plans to serve communities where there is no local small business procurement specialist; and
- (3) specify the metrics used to measure the Army's effectiveness in reaching small businesses, including in areas where there is no local small business procurement specialist.

TITLE X—GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

OTHER MATTERS

Briefing on Support to Civil Authorities in Support of Natural Disasters and Law Enforcement with Aerial Platforms and Satellites

The committee recognizes that the Department of Defense provides resources at the request of States, territories, and other Federal agencies in support of natural disasters and matters of law enforcement. Some of this support comes in the form of unmanned and manned aerial systems supporting search and rescue operations, natural disasters (to include preemptive measures), and through collaboration between the Department and other Federal agencies. The committee also recognizes that the Department utilizes some of its space-based resources to assist in wildfire support (to include detection) and other natural disasters. The committee is concerned that there is a lack of understanding of the policy, procedures, and overall availability of Department resources.

Therefore, the committee directs the Secretary of Defense, in coordination with the Director of the National Geospatial-Intelligence Agency, to provide an unclassified briefing to the House Committee on Armed Services not later than September 30, 2019, on the availability of Department resources, focusing on aerial and satellite platforms in support of natural disasters and law enforcement, the assets that are currently available, and how States, territories, and Federal agencies request or access these resources.

The briefing should provide:

(1) an explanation of Unmanned Aerial Systems (UAS), piloted platforms, and satellite support the Department provides or can provide to States and other Federal agencies, including examples of support provided, length of time to approve requests, whether any requests were disapproved and the reason that such requests were disapproved, during calendar year 2018.

(2) an overview of programs, including satellite systems, that provide wildfire support to States and Federal agencies, including how long such programs have been in operation, the processes by which States access such programs, and whether such programs provide detection and early warning as well as support during wildfires. The overview shall include examples of the support the Department provided in calendar year 2018 to wildfire suppression and wildfire detection.

(3) an overview of current policies regarding the use of such systems and platforms by States and Federal agencies and the procedures a State or Federal agency must follow to obtain Department support for natural disasters and search and rescue operations, including whether UAS require additional approvals, and the amount of time to obtain additional approvals. Further, a discussion of whether such procedures can be streamlined, and whether different authorities exist when requesting use of unmanned systems versus manned systems.

(4) a description of the different categories of the Department's UAS, how the different categories are managed, and if certain UAS categories affect the Department's ability to provide support to a State or Federal agency.

(5) a description of how the Department shares imagery collected by manned aircraft and UAS with Federal, State, and local disaster responders, including whether such imagery is shared in real time.

(6) an explanation of any restrictions on the use of UAS under the “Guidance for the Domestic Use of Unmanned Aircraft Systems in U.S. National Airspace”, August 18, 2018, and Department of Defense Instruction (DODI) 3025.18 “Defense Support to Civil Authorities,” or other relevant Department of Defense guidance.

(7) a description of how the Department (Active Duty, National Guard, and the Reserves) supports other Federal agencies with UAS assets, specifically the Department of Homeland Security (DHS) and Custom and Border Protection (CBP), including examples of requests that were supported or not supported and an explanation for such determinations.

(8) a description of policies and laws that facilitate or restrict Department support to DHS or CBP, and a description of any systems in place that enable long-range planning to support DHS and CBP support requests.

(9) an analysis of how the Department of Defense can improve access and knowledge of resources to States, territories, and other Federal agencies and whether there are plans to make more assets available in the future.

(10) any other matters the Secretary determines appropriate.

Commercial Technology Support to Audit Efforts

The committee notes the rapid progress of commercial digital technologies such as robotic process automation, cognitive computing, and artificial intelligence, and encourages the Department of Defense to leverage such advancements in order to improve the quality and richness of financial data, reduce or eliminate manual processes and complex financial reconciliations, and accelerate the Department's achievement of an unmodified audit opinion. The committee directs the Under Secretary of Defense (Comptroller), in coordination with the Chief Management Officer, to provide a briefing to the House Committee on Armed Services not later than February 1, 2020, on the initiatives the Department has undertaken to incorporate commercial digital technologies into the Department's business processes.

Independent Study on Detainee Medical Care at United States Naval Station, Guantanamo Bay, Cuba

The committee notes the important value of an independent assessment of detainee medical care at United States Naval Station, Guantanamo Bay, Cuba. Therefore, the committee directs the Comptroller General of the United States to provide a report to the congressional defense committees not later than September 1, 2020, on the quality of medical care provided to detainees at United States Naval Station, Guantanamo Bay, Cuba. The report shall include the following:

(1) a review of the medical care, including specialty care, provided to detainees at Guantanamo after January 10, 2002;

(2) an assessment of the health care requirements of the detainees at Guantanamo;

(3) an assessment of relevant standards of care for comparison to the quality of medical care provided for detainees at Guantanamo;

(4) whether there are specific professional or training requirements for providers at Guantanamo, and how this may affect the provision of medical care for detainees;

(5) whether there are specific challenges to providing health care, including specialty care, to detainees at Guantanamo, such as policy, practice, and organizational factors; access to detainee medical records; and security clearance policy and the need for security clearances; and

(6) an assessment of policies at Guantanamo related to detainee medical records and their interaction with the Military Commissions process, including any impacts on medical care.

As appropriate, the report shall provide recommendations for policy changes, including any recommendations that would require legislative action. The report shall be unclassified without dissemination control, but may include a classified annex.

Office of the Chief Management Officer Human Capital Analysis

The committee notes that the Office of the Chief Management Officer (CMO), which establishes policy and guidance for business system investments, has not demonstrated that it has conducted a human capital analysis, as recommended by the Government Accountability Office (GAO) in May 2013. The committee is concerned that without the insights provided by such an analysis, the Office of the CMO will be limited in its ability to plan strategically to address skill gaps, likewise limiting its ability to lead improvement initiatives across the Department of Defense. Given the importance of defense business system investments to key Department initiatives such as Financial Improvement and Audit Remediation, the committee believes it important that the CMO perform such an analysis at the earliest possible date. Accordingly, the committee directs the Chief Management Officer to provide an interim briefing to the House Committee on Armed Services not later than September 30, 2019, outlining a plan to conduct a human capital analysis pursuant to the GAO recommendation, as well as a report to the congressional defense committees not later than January 15, 2020, detailing the results of the human capital analysis.

Report on the Process for Repatriation of Individuals Who Have Been Cleared for Transfer out of United States Naval Station, Guantanamo Bay, Cuba

The committee is concerned that the process for transferring individuals detained at U.S. Naval Station, Guantanamo Bay, Cuba, to third countries once they have been cleared for transfer by a periodic review board or the Guantanamo Review Task Force has ceased to make headway. A number of individuals detained

at U.S. Naval Station, Guantanamo Bay, have been cleared for transfer to third countries, yet no such cleared individual has been transferred since January 20, 2017.

In addition, an envoy in charge of detainee repatriation has not been appointed, and although periodic review boards (PRBs) continue to operate, the status and the future of the transfer process is unclear. The committee believes that the lack of transfers poses serious policy and human rights concerns, and that the lack of transfers is having a substantial negative impact on the functioning of the PRB process and other proceedings at the Guantanamo Detention Facility, as well as the detainee population and Joint Task Force Guantanamo personnel. The committee believes the repatriation process should recommence immediately and urges the administration to facilitate the transfer process without delay.

In light of these concerns, the committee directs the Secretary of Defense to submit a report to the congressional defense committees not later than September 30, 2019, on the state of the repatriation process. The report shall be unclassified without dissemination control, but may include a classified annex. At a minimum, the report should address the following issues:

- (1) the status of and current plans for the repatriation process;
- (2) an explanation of the reasons why there has not been a transfer of an individual who has been cleared for transfer by a periodic review board or the Guantanamo Review Task Force since January 20, 2017, including any policy reviews or changes that have occurred to the PRB process;
- (3) the current state of each individual's case who has been cleared for transfer, but has not been transferred, including any actions taken to facilitate their transfer, any obstacles to their transfer, the current state of any planning for transfer;
- (4) an explanation of the reasons why a repatriation envoy for the Department of Defense has not been appointed, the impact that the lack of a repatriation envoy has on the repatriation process, whether there have been any efforts in the absence of a repatriation envoy, and an assessment of those efforts if applicable;
- (5) an assessment of who in the administration is currently in charge of arranging transfers for cleared detainees, monitoring former detainees' safety after repatriation or resettlement, and monitoring country compliance with transfer agreements;
- (6) the status of and current plans for the periodic review board process; and
- (7) an assessment of any collateral impacts to the detention process and proceedings at Guantanamo that have occurred as a result of the lack of transfers.

TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

ITEMS OF SPECIAL INTEREST

Briefing on Afghanistan Reconciliation

The committee is aware that reconciliation talks have begun between the United States and the Taliban regarding a negotiated peace in Afghanistan. The committee supports the objectives of the South Asia strategy to create the conditions to support a political settlement in Afghanistan, and the efforts of the Special Representative for Afghanistan Reconciliation, the Secretary of State, and the Commander, Resolute Support Mission, to engage in reconciliation talks. Therefore, the committee directs the Secretary of Defense, in coordination with the Secretary of State and the Director of National Intelligence, to provide a briefing to the House Committee on Armed Services by October 1, 2019, on the status of the U.S reconciliation negotiations with the Taliban and progress toward an intra-Afghan dialogue between the Afghan Government and the Taliban, as well as any potential shifts in the posture of the U.S. Armed Forces in Afghanistan as a result of successful negotiations. Such briefing shall also include the following elements with respect to the extent to which Taliban leaders present at the reconciliation talks:

- (1) maintain active association with terrorist organizations inside and outside of Afghanistan;
- (2) support the legitimacy of the Government of Afghanistan;
- (3) commit to maintaining societal gains advanced in the past 18 years including: protecting the rights of women and girls to access public healthcare, hold property, access education, and have freedom of movement;
- (4) commit to stop receiving funds and military support from non-Afghan governments or organizations;
- (5) will assist and be an active participant with the Government of Afghanistan in future counterterrorism operations; and
- (6) any other matter the Secretary of Defense considers appropriate.

Briefing on Defense Department Plans for the European Deterrence Initiative

The committee continues to support the European Deterrence Initiative (EDI) and seeks to ensure a sustained U.S. commitment to deterrence in Europe at levels appropriate to the challenges at hand. Therefore, the committee directs the Secretary of Defense, in coordination with the Commander, U.S. European Command, to provide a briefing to the House Committee on Armed Services not later than October 30, 2019. The briefing shall include the following:

- (3) a comparison identifying and explaining the differences and similarities between the plans and assumptions identified in (1) and (2);
- (4) a detailed explanation of the rationale and implications of any changes in the plans and assumptions identified in (1) and (2); and
- (5) any other matters the Secretary considers appropriate.

Comptroller General Review of Posture to Counter Russian Aggression

The National Defense Strategy highlights challenges to the sovereignty and integrity of North Atlantic Treaty Organization (NATO) members posed by Russian aggression across all warfighting domains. NATO remains the foundation of trans-Atlantic security, and the committee supports U.S. engagement with our NATO allies. Since 2014, Congress has funded the European Deterrence Initiative (EDI) to strengthen our partnerships and deter Russian aggression by increasing the presence of U.S. forces and prepositioned equipment in Europe, improving infrastructure, supporting NATO enhanced forward presence deployments, and sponsoring multinational training and exercises. In testimony before the committee, the Commander of U.S. European Command stated these efforts have improved readiness and helped deter Russian aggression, but stressed the need to further augment U.S. ground, air, maritime and cyber forces and capabilities, and invest in NATO's logistical infrastructure and capacity.

Recognizing the long-term commitment to preserving peace and stability in Europe, the committee supports a strategy to counter Russian aggression, deter conflict, and achieve victory in a conventional conflict if deterrence fails. However, given the incremental approach taken under EDI to date, the committee is concerned that the options for meeting the force structure, posture, and readiness requirements to implement such a strategy have not been fully assessed. Therefore, the committee directs the Comptroller General of the United States to assess the extent to which the Department of Defense has evaluated its force structure and posture options for countering Russian aggression in Europe. At a minimum, this review should assess the extent to which the Department of Defense has:

- (1) assessed requirements for land, air, maritime, space, and cyber capabilities and force structure;
- (2) evaluated the strategic, operational, and tactical benefits and costs of different posture options, including forward stationed forces and rotational deployments;
- (3) assessed the strategic lift, intra-theater mobility, infrastructure, and logistical support requirements and costs for different posture options; and
- (4) factored in how U.S. Armed Forces would integrate with NATO enhanced forward presence and other forces.

The Comptroller General shall provide a briefing to the House Committee on Armed Services not later than March 1, 2020, on preliminary findings of the review, and to present final results in a format and timeframe agreed to at the time of the briefing.

Implementation of Taiwan's Defense Strategy

The committee recognizes that April 10, 2019, marks the 40th anniversary of the Taiwan Relations Act of 1979 (Public Law 96-8). The committee believes: (1) the Taiwan Relations Act and the Six Assurances are both cornerstones of United States relations with Taiwan; (2) the United States should strengthen defense cooperation with Taiwan to support the development of capable, ready, and modern defense forces necessary for Taiwan to maintain a sufficient self-defense capability; (3) the United States should promote policies concerning exchanges that enhance the security of Taiwan, including opportunities for practical training and military exercises with Taiwan and exchanges between senior defense officials and general officers of the United States and Taiwan consistent with the Taiwan Travel Act (Public Law 115-135); and (4) the United States should transfer defense articles to Taiwan to improve Taiwan's self-defense capability.

The committee directs the Secretary of Defense, in coordination with the Secretary of State, to provide a report to the congressional defense committees, the House Committee on Foreign Affairs, and the Senate Committee on Foreign Relations not later than October 1, 2019, on activities to support Taiwan's implementation of its defense strategy.

At a minimum, the report shall include:

- (1) an assessment of existing and likely future threats to Taiwan, and Taiwan's implementation of its defense strategy;

(10) an identification of tactics, techniques, and procedures likely to be used in future Chinese influence operations and campaigns targeting democratic elections and military alliances and partnerships of which the United States is a member.

Report on Effective Security Sector Assistance Tools

The committee notes the United States has used a variety of security sector assistance tools to support partner forces in the campaign to defeat the Islamic State of Iraq and Syria since 2015. The purpose and scope of this assistance has changed over time. The committee recognizes that there may be other, potentially more effective means of assisting and building lasting capabilities within U.S. military partner forces.

Therefore, the committee directs the Secretary of Defense, in coordination with the Secretary of State, to provide a report to the House Committee on Armed Services not later than September 30, 2019, that analyzes the use of security sector assistance in the campaign to defeat the Islamic State of Iraq and Syria and the effectiveness of these tools for building partner capacity. The report should specifically review stipends as a security sector assistance tool and provide a comparison of stipends and other avenues of security sector assistance such as training and equipping. The report should identify other examples in which stipends have been used as a tool of security sector assistance, if applicable, the effectiveness of those cases, and whether stipend payments were transitioned to other security sector assistance methods. The report should further address the impact of stipends on the ability to pursue effective institutional capacity building within military partner institutions.

The report shall be divided into two sections, which respectively address influence operations and campaigns targeting: (1) recent and upcoming elections in the United States (dating back to January 1, 2017), and (2) military alliances and partnerships of which the United States is a member. The report should also include a strategy to counter these activities. The committee further directs the Secretary of Defense to provide an interim report not later than November 5, 2019, and a final report not later than September 30, 2020.

The report shall be unclassified and appropriate for release to the public but may include a classified annex. At a minimum, the report should include:

(1) an assessment of Russia's objectives in influence operations and campaigns targeting democratic elections and military alliances and partnerships of which the United States is a member, and how such objectives relate to Russia's broader strategic aims.

Report on U.S. Central Command's Accounting For and Management of Funds Received from Foreign Partners for Services

The committee is concerned that U.S. Central Command was unable to properly account for the fuel and in-flight refueling services that were delivered to the Saudi-led coalition in support of its conflict against the Houthis in Yemen. The committee directs the Secretary of Defense to provide a report to the House Committee on Armed Services, not later than September 30, 2019, on how U.S. Central Command accounts for and collects monies owed and received from foreign, non-coalition partners for goods and services rendered through acquisition and cross-servicing agreements and other potential avenues of exchange. Further, the report should include the command's process and procedures for tracking goods and

services delivered and under what circumstances or conditions reimbursement for goods and services is not sought from foreign countries.

Therefore, the committee directs the Secretary of Defense to provide a report to the House Committee on Armed Services not later than September 30, 2019, on all activities being undertaken by the U.S. military in Syria and conditions that the Department of Defense seeks to achieve before the U.S. military withdraws from Syria. The report should be submitted in unclassified form but may include a classified annex.

Report on U.S. Strategy to Respond to Russian Threats in the Black Sea

The committee is concerned by Russia's attack on Ukrainian vessels near the Kerch Strait that occurred on November 25, 2018, by its ongoing detention of Ukrainian sailors in the aftermath of that event, and by Russia's aggressive policies in the Black Sea region. Russia's actions pose a threat to lawful navigation in the Black Sea and Ukrainian sovereignty.

The committee is also concerned by Russia's ongoing illegal occupation of Crimea, its ongoing efforts to intimidate U.S. allies and partners in the Black Sea region, its buildup of military resources that could impinge on the sovereignty and freedom of navigation of countries in the Black Sea region, its efforts to interfere in regional elections and political systems, and its efforts to use the region as a vector to facilitate malign activities in the Balkans and other parts of Europe. The committee condemns Russia's actions and reaffirms the commitment of the United States, in coordination with its allies and partners, to countering Russian aggression and deterring actions that impinge on the sovereign rights of U.S. allies and partners in the Black Sea area.

Therefore, the committee directs the Secretary of Defense, in coordination with the Secretary of State, to submit a report to the congressional defense committees and the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate, not later than October 15, 2019, on the United States strategy to counter Russian threats in the Black Sea. SPACE ACTIVITIES

Report on Commercial or Non-Commercial Security Launch Sustainability

The committee directs the Secretary of the Air Force to provide a report to the congressional defense committees and the congressional intelligence committees not later than 45 days after the date on which the Secretary of the Air Force selects during fiscal year

2020 two National Security Space Launch providers to be awarded phase two contracts, on whether each selected provider is sustainable as a business based on current or future launches by entities other than the Air Force.

INTELLIGENCE MATTERS

Airborne Intelligence, Surveillance, and Reconnaissance Operational Assessment

The committee recognizes the critical role that Department of Defense airborne intelligence, surveillance, and reconnaissance (ISR) capabilities play supporting military operations worldwide. The committee understands that responsive, persistent, and precise collection of operational information from the air will continue to provide an asymmetric and decisive advantage to operational commanders and tactical forces. The committee also recognizes that to meet the objectives described in the National Defense Strategy, the Department of Defense must modernize and adapt its ISR operating concepts and joint force structure to ensure it can maneuver, fight, and prevail in highly contested environments. However, the committee notes that there is an apparent lack of an integrated joint approach to the Department's ISR modernization strategy. The committee is concerned by recent military service decisions to reduce certain airborne ISR collection platforms without a clear transition plan or approved risk mitigation strategy, despite facing significant deficiencies in collection capacity.

The committee directs the Secretary of Defense to conduct a stress test of joint intelligence, surveillance, and reconnaissance enterprise capabilities required to achieve the operational objectives of its highest priority global campaign plans and evaluate the capability and capacity of existing service programs of record to satisfy joint force requirements for critical categories of intelligence. The committee also directs the Secretary of Defense to provide a briefing to the House Committee

on Armed Services by March 1, 2020, on the results of this stress test. The briefing shall include capability and capacity shortfalls in platforms, sensors, and personnel, as well as address proposed risk mitigation strategies to address critical deficiencies.

Tyndall Air Force Base Recovery

The committee is concerned about the devastation caused by Hurricane Michael at Tyndall Air Force Base on October 10, 2019. The committee is also aware that the Department of the Air Force has made a decision to locate Joint Strike Fighter aircraft at Tyndall Air Force Base and plans to rebuild the installation as a purpose-built fifth-generation fighter “base of the future.” The committee directs the Secretary of the Air Force to submit a report to the House Committee on Armed Services not later than January 31, 2020, on the detailed master plan for executing all actions, including funding requirements by fiscal year, to fully recover from Hurricane Michael and to support the beddown of three Joint Strike Fighter squadrons and an MQ-9 wing as previously announced. The report should also include details of the environmental impact analysis schedule as required by the National Environmental Policy Act of 1969 (Public Law 91-190), planning and design, anticipated construction schedule by year, and planned delivery dates of aircraft by fiscal year. The Department of the Air Force shall also identify any constraints to the execution of the rebuild of Tyndall Air Force Base and ability of the base to accept the planned delivery of the Joint Strike Fighter aircraft by 2023 as currently planned.

Naval Reactors

Low-Enriched Uranium Fuel for Naval Reactors

The committee notes that since September 11, 2001, the U.S. Government has sought to remove weapons-usable highly enriched uranium (HEU) containing 20 percent or more uranium-235 from as many locations as possible because of concerns related to nuclear terrorism. The committee notes that the primary focus of this strategy has been on replacing HEU civilian research reactor fuel and targets used in the production of medical radioisotopes, with non-weapons-usable low-enriched uranium (LEU) fuel and targets. This program to reduce the use of HEU for civilian purposes has been successful in reducing the amount of HEU worldwide that could have been at risk of theft or diversion. However, this effort did not address the use of HEU for military purposes. Naval reactors account for the largest share of global HEU use other than nuclear weapons, and in the United States, the fuel is fabricated in civilian, not military, facilities. The committee has been supportive of efforts to assess the feasibility of using low-enriched uranium for naval reactors as such use would not only benefit nuclear non-proliferation efforts but also maintain the research and development skills necessary to sustain innovation and expertise with regard to naval fuel as research and development efforts on the Columbia-class reactor end. The committee continues to support efforts to assess the feasibility of using LEU in naval reactors to meet military requirements for aircraft carriers and submarines.

The National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) required a nuclear submarine study. However, this study lacked sufficient detail to respond to the congressional mandate. Therefore, the committee directs the Administrator for Nuclear Security, in coordination with the Secretary of the Navy, to provide a report to the congressional defense committees not later than December 15, 2019, assessing the feasibility of a design of the reactor module of the Virginia-Class replacement nuclear powered attack submarine that retains the existing hull diameter but leaves sufficient space for an LEU-fueled reactor with a life of the ship core, possibly with an increased module length. If a life of the ship core is unattainable, the report should include the feasibility of a reactor design with the maximum attainable core life and a configuration that enables rapid refueling.
