## Charting the world's growing CO<sub>2</sub> emissions

Technologically advanced countries with post-industrial economies have been able to stabilize or slightly reduce carbon emissions from the combustion of fossil fuels, but such emissions are rapidly rising in developing countries.

**World CO<sub>2</sub> emissions**  
from fossil fuels and cement  
BILLION METRIC TONS

BILLION METRIC TONS OF CARBON DIOXIDE FROM FOSSIL FUELS AND CEMENT PRODUCTION

\*Emissions from international aviation and shipping
